DIMENSIONS

- Height = 2HU
- Width = 483 mm (19")
- Depth = 300 mm (to rear)
  45 mm (to front)

CELLweaver

CELLWEAVER COMBINES UP TO FOUR 4G OR 3G SIM CARDS PER UNIT TO DELIVER EXCEPTIONAL BANDWIDTH FOR HIGH INTENSITY USERS.

This simple yet clever router is ideal for use in coastal waters, where given suitable mobile network coverage it can deliver bandwidth considerably greater than VSAT and at a substantially lower cost.

By inserting up to four 4G or 3G SIM cards from the same network the user combines their capability to get four times the bandwidth in a single stream. With 3G speeds of around 15-40 Mbit/s are readily obtainable and 4G can deliver speeds of up to 1200 Mbit/s.

USER BENEFITS

- High internet speeds in coastal regions
- Ideal for data-intensive applications such as streaming TV services
- Bespoke data packages help manage running costs
- Choose local best value SIM cards or professional roaming contracts
- Single IP address allows access to online TV services and online banking

INSTALLER BENEFITS

- Four 4G SIM cards combined: Up to 1200Mbit/s
- Simple installation - just one antenna
- Optional second antenna for increased availability
- Hot-plaggable SIM slots
- Bonded data has 1x IP address (can be UK)

ADDITIONAL FEATURES

- Automatic fall-back to 3G
- Traffic/data reporting by date, date range and SIM card
- Full SMS support
- Automatic messaging to designated contact if 90% of PAYG data is used
- Professional rack-mounted system
- Remote management facilities allow first class support.
