Top- and clear coat sanding process

Mirka® DEROS 650CV 150 mm, orbit 5 mm

Mirka° PS1437 Polisher, 150 mm

STEP

Net interface + Galaxy 150mm, Grit 1200-1500

+ Galaxy 150mm, Grit 2000

STEP 1

STEP 2

Eliminate scratches

STEP 3

+ Black waffle M foam pad.

Micro fiber cleaning cloth

SANDING

STEP 1

• Start sanding with Mirka® DEROS 650CV using a Net Interface and Galaxy 1200 or 1500 grit.

STEP 2

- Clean the surface between every sanding step to avoid contamination and get a better visibility of the sanding progress.
- Continue sanding with Galaxy 2000 grit

STEP 3

• Continue wet sanding with Abralon® J3 3000.

POLISHING

STEP 1

• Polish the surface with Polarshine® 35 and a Lambswool Pad PRO together with Mirka® PS 1437 Polisher to eliminate sanding scratches.

STEP 2

• For dark coloured surfaces, continue with Polarshine® 12 Black with a Black Waffle M foam pad to remove any polishing marks, haze and holograms.

• Wipe off any excess polishing compound.

NOTE! By extending the sanding process and using finer grits, the polishing time will shorten and lower the total production time and cost.
