

Since 1996, Electric Fuel's Safety Products Division has produced lifejacket lights for the commercial aviation and marine safety markets. Lights are all certified for use by relevant governmental agencies under the strictest international regulations (including SOLAS, USCG, EC Directive, FAA TSO).

The Electric Fuel technical team has state of the art expertise in the fields of electrochemistry, electronics, software and battery design, production, packaging and testing. Electric Fuel is certified to ISO 9001:2008 by DNV and ensures that all phases of development and manufacture are covered by strict quality control procedures.

Electric Fuel is part of Arotech Corporation's power sources division which is made up of the Epsilor-Electric Fuel Ltd. facilities in Israel and Electric Fuel Battery Corporation in the US.
