

ESA COACH

True Wind data on your coach boat

Learn the condition of the sailing field in real time monitoring wind and drift with a single unique system.

Sensor may vary depending the configuration

Analyze in real time and record all field data.

Create the history of the coaching sessions or regattas, through the wind sensor, the powerful 20 Hz embedded GPS and compass. All data can be analyzed in real time or later to a better support for coaching purposes.

Choose the configuration among wi-fi wind sensor or the cabled wind sensor ; expand in any time your possibilities with the log sensor to let Esa Coach to give you also your drift in real time.

Esa Coach provides innovative and powerful algorithms for wind and drift calculation.
