

TZ Coastal Monitoring: the cutting edge Maritime surveillance solution you can afford!

TZ Coastal Monitoring is the first true turnkey solution for Maritime Surveillance. When selecting a technical solution, customers always have to face the same question: BUILD or BUY?

Do you have to manage an infrastructure/business with limited human and financial resources?

Are you looking for a solution with the following specifications?

- Easy to Use
- Quick to implement
- Low maintenance cost

All this at the best value for money?

The answer to all these questions is TZ Coastal Monitoring

TZ Coastal Monitoring ready-made packages provide you with the advantages of a standard system that covers most business requirements at a fraction of what it would cost to have such a system custom-developed for you.

Cost-effective

Most Coastal Management processes can be supported by off-the-shelf system packages. These ready-made packages provide you with the advantages of a standard system that covers most business requirements at a fraction of what it would cost to have such a system custom-developed for you.

Proven reliability

In addition, you also benefit from a system that has been tried and tested by other companies similar to your own. As a result, you avoid the typical problems that are encountered when new systems are implemented that have been specifically developed for your needs.

Experienced partners

We offer robust solutions through Furuno, the strongest marine electronics distribution network in the world. This is coupled with years of experience in application implementation based on our advanced technological knowledge. Our technical and financial partnership with the Furuno group means that our professionalism and reliability are guaranteed.

TZ Coastal Monitoring offers native and advanced compatibility with most of the latest generation of Furuno Radars. TZ Coastal Monitoring is the only package that offers this outstanding integration with Furuno.

Customizable

The standard system that we offer can in many cases, be configured to better meet your specific needs.

Features

- Monitoring and identification of vessels and other navigational objects.
- Optimization of port infrastructure utilization.
- Detection of illegal activity (terrorism, piracy, illegal immigration, illegal fishing).
- Collision Avoidance.
- Assistance in search and rescue and in coastguard activities.
- Record and Replay Capability for administrative purposes.

Watch this [video](#) demonstration and discover an example of Radar Target Auto-Acquisition and Camera Tracking:

The banner features the TZ COASTAL MONITORING logo on the left, a 'DISCOVER NOW' button in the center, and two images of industrial facilities on the right. The first image shows a refinery or port facility at dusk, and the second shows an offshore oil rig.

This off-the-shelf product boasts a level of functionality that rivals the most established players in the maritime surveillance market.

Here are a few examples of the types of customers who have installed TZ Coastal Monitoring systems:

- Military: “National Guard” Sites in the United States / “Special Ops” Sites in South Africa / “Kenya Navy’s Maritime Operations Centre” sites along the Kenya coast / “Portuguese Army - SEATEC” sites in Portugal
- Ports: 3 ports in the United Arab Emirates / Philippines Harbour / Port of Bayonne in France
- River Sites: US Army Corps of Engineers (Ohio River)
- Nature Reserves: 3 Galapagos Islands to WWF
- Oil Platforms: 3 platforms in Venezuela / 1 platform in Malaysia
- Fish Farms: 30 fish farm sites equipped in Norway and Chile

You will find more details on the [Coastal Monitoring website](#).
