Manufactured by

**Ultralon**<sup>®</sup>

FOAM GROUP

## Ultralon Foam International

Ultralon® is designed and produced by Ultralon® Foam International, a leading global manufacturer of PE and EVA foam, using its own dedicated plant and IP. Tightly controlled manufacturing processes, careful selection of raw materials, high level technical expertise and the latest technology and equipment, enable the company to offer customers quality, reliability and consistency of product.

Ultralon® closed-cell chemically cross-linked foams are manufactured from polyethylene (PE), ethylene-vinyl acetate copolymers (EVA) or a high-tech blended copolymer. The fine cell structure gives zero absorption, a high buoyancy rating and excellent chemical resistance.

Ultralon® foams are produced in moulded block form and can be trimmed to size and thickness. They are easily processed, using standard foam-processing machinery. No chlorofluorocarbon (CFC) product or derivatives are used, and no organic fillers are added to foams.

## Ultralon® Laminate

Ultralon® Laminate is a Dual or Triple colour layered foam decking available in two different grades. We are experienced foam manufacturers and have been in the business for over 50 years, you cannot beat our experience and world leading formulations. The traditional plank look, as well as custom patterns, logos or names are achieved by CNC routing through the top layers of the foam, exposing the layers underneath. Edges can be bevelled to create a high-quality finish. Colours can be combined to offer striking aesthetics that will quite simply transform any surface on any boat.

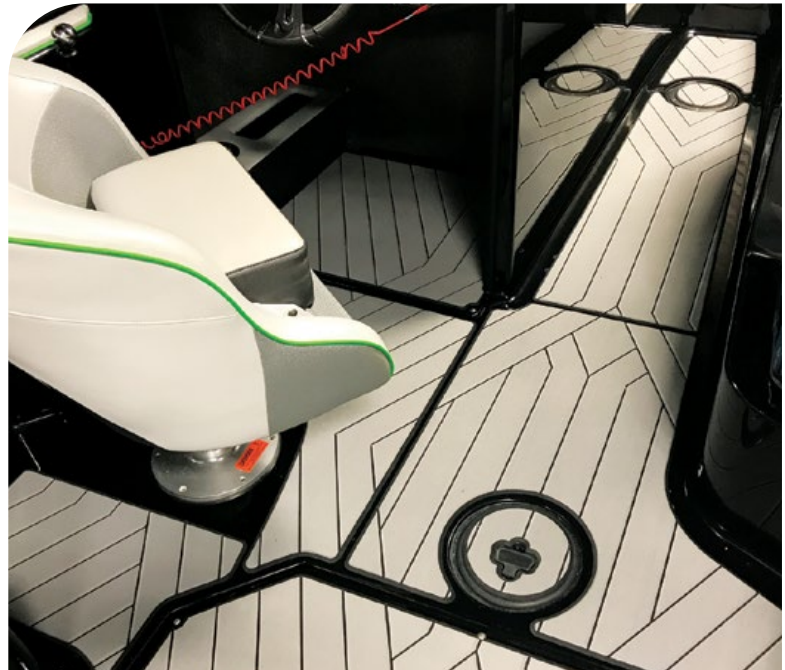

## Ultralon® Comfort

New in 2021, Ultralon® Comfort is a multi-purpose dual or triple layer marine decking that is popular on boats of all types around the world, offering a practical, easy maintenance and cost effective alternative to teak products.

## Ultralon® High Performance

Our High Performance Ultralon® marine decking foam has stood the test of time, we have proven ourselves over the past seven years with only minor tweaks to our formulation that we have the best performing decking foam in the world. Increased durability, lower susceptibility to light amplification, improved heat tolerance and less shrinkage are some of the many reasons our marine decking foam is highly sought after. Ultralon® High Performance is one of the highest performing, hardest wearing, toughest wearing decking foams available for your customers' needs.

## Ultralon® Laminated Colour Range

01 Black Brushed

02 Winter Grey Brushed

03 Teak Brushed

05 Light Grey Brushed

07 Steel Grey Brushed

10 Blue

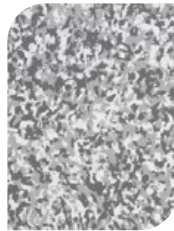

11 Light Blue

12 Bashful Blue

13 Army Camo

14 Snow Camo

15 White

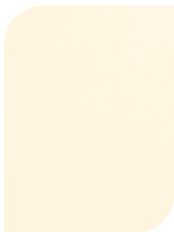

16 Lime Green

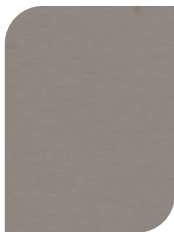

17 Seafoam Green

18 Cream

19 Holly

20 Light Camel

21 Red

23 Orange

24 Brown

*Please speak with us about any requirements for non-standard colour combinations. Minimum order quantities will apply.*

## U-TREAD™

U-TREAD™ marine decking in moulded OCTI™ pattern is a hardwearing deck tread suitable for floors, gunwales, trailers and general wet areas, improving safety and underfoot comfort when out on the water.

**SHEET SIZE: 2050mm x 1030mm x 6mm (82" X 41" X 0.24")**

## U-DOT™ & NANO-DOT™

This anti-slip deck tread with a unique pressed dot pattern and a buff finish is, like all Ultralon® decking solutions, durable and easy to maintain. U-DOT™ and NANO-DOT™ can be laminated with a contrasting base colour foam and routed for a truly custom look.

**SHEET SIZE: 2050mm x 1030mm x 3mm (82" x 41" x 0.118")**

## Ultralon® SURF-GRIP™

Ultralon® SURF-GRIP™ features all the same benefits as U-TREAD™ marine decking, with a narrower pre machined profile and groove tread pattern making it ideal for jet skis, boats and surfboards.

**SHEET SIZE: 1220mm x 480mm x 5mm (48" x 19" x 0.2")**
