

## Glock Audio VOC<sup>COM</sup> HS-2060

Ultra-compact high performance loudspeaker

The HS-2060 loudspeaker provides long range communication solutions. It is a patented high performance loudspeaker in an ultra-compact array format, weighing only 5.5 kg. It provides excellent intelligibility over distances of 500 to 1200m.

### Are you involved in Evacuation, Fire Rescue, Border Protection, Maritime Safety, Police or Military Missions?

The HS-2060 is part of the VOC<sup>COM</sup> systems, which has been developed in conjunction with users to allow flexibility for integrating in land, sea or air. All VOC speaker systems can be integrated to fit the user requirements, with the HS-2060 speakers combining to be used bi-directionally.

The rugged construction of the HS-2060 loudspeaker has been tested through use in civil defence, protection against threats, homeland security, fire services, border security and civil applications.

### Do you require reliable, multi-functional audio solutions?

The VOC<sup>COM</sup> system enhances interagency coordination and cooperation by offering flexibility, efficient design, high performance, professional customer support and industrial safety and operator protection.

The HS-2060 can not only pair with other speakers in the VOC<sup>COM</sup> family, but is also available with a selection of accessories. This is why Glock Audio products are deployed in military and security installations worldwide, both in fixed and mobile applications.

## Specifications of the HS-2060

Model:	Passive VOC-System loudspeaker
Freq. Range:	±10 dB 300 Hz to 8 kHz ±3 dB 500 Hz to 7 kHz
Coverage:	nominal 60° x 35° (hor. x vert.)
Sound pressure level max:	(1 m) 136 dB SPL @ 1 kHz
Sound pressure level peak:	(1 m) 138 dB SPL
Surface treatment:	Black or according to customer requirements
Enclosure type:	Aluminium & Stainless Steel
Dimensions (W x H x D):	285 x 320 x 280 mm
Weight:	5,5 Kg
Temperature range:	-30° C bis +70° C (non condensing)
