Announcing Big Blue Yacht Communications

Big Blue Maritime branches out

28 October 2019 - *Big Blue Maritime* is proud to launch Big Blue Yacht Communications at this year's METSTRADE, 19-21 November 2019, RAI Amsterdam. Big Blue Yacht Communications is a company created to develop and supply premium audio communication systems for yacht racing, cruising and all maritime activities that require high level digitally assisted communications.

Big Blue was created by founders Matt Cornwell and Suzanne Coop who worked together in the last America's Cup, developing the most expansive audio coms system ever produced for yacht racing. With the experience gained there and the need for high quality, reliable coms systems for a marine environment ever growing, it was a natural step to branch out and create a company specifically aimed at that market.

As well as our continuing America's Cup work, we are now supplying all SailGP teams with their audio coms systems, which are also being used by the SailGP TV for the broadcast onboard audio.

We welcome you to visit our stand, 09.402, where the Big Blue team will be available to talk through our services and demonstrate our latest audio communication products.
