OPTIMUM™

THE SMART, CONNECTED, ELECTRIC DOWNRIGGER

LIFETIME WARRANTY

FEATURES

ONE-BOAT NETWORK

Optimum downriggers wirelessly network together giving you control of all of your downriggers with push of a button. They connect with your Humminbird® fish finder and your mobile device for total control and to display trolling data. With the One-Boat Network™, your advanced fishing gear does more than work together. It starts talking to each other wirelessly, to help you find, stay on and land more fish.

**Free Software update coming Spring 2020*

FULL-COLOR LCD SCREEN

The full-color 3.5" display shows critical trolling data right on your downrigger, taking the guess work out of your trolling presentation.

MOBILE APP CONTROL

The Cannon® mobile app connects to your Optimum downriggers, putting you in total control. Set, cycle or raise weights, access Fish Hawk sensor data...it's all there at your fingertips.

WIRELESS INTEGRATION

- Auto Up allows you to retrieve weights simultaneously across networked downriggers with the push of a button
- Bottom Tracking keeps your bait presentation at a precise distance off the bottom
- Depth Cycling - Cycle your bait within a set depth range
- Positive Ion Control
- Waterline Zero
- Telescopic boom extends from 24" to 53"
- 250 feet-per-minute retrieval speed
- 20-lb weight capacity

Every Optimum downrigger integrates wirelessly with the Fish Hawk™ X4D to give you the info you need to troll successfully. You'll know more than surface water temp and speed. Your Optimum display will also show you the true depth, trolling speed and temperature at the weight. Through the One-Boat Network, you can also access this data through your mobile device and Humminbird fish finder.

PUT A BIRD IN YOUR MOTOR

BUILT-IN MEGA

BUILT-IN MEGA

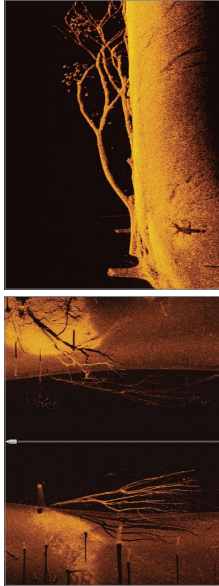

Built-In MEGA Side and Down Imaging®
Your next motor can deliver the **clearest images right to your Humminbird®**

With Humminbird MEGA Side and Down Imaging transducers built into the lower unit of Ultrex™ and Ulterra® motors, you've got a new secret weapon. Put more MEGA in your motor and get the clearest, most detailed images ever delivered right to your Humminbird fishfinder.

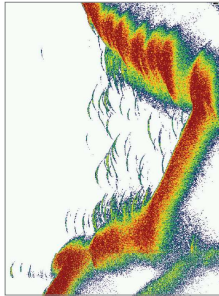

➤ **Get the Most Out of MEGA**

Humminbird MEGA Imaging® opened the eyes of anglers everywhere by taking fish finding into the megahertz frequency for the first time. Now your Minn Kota motor can deliver crystal clear MEGA Side and Down Imaging of what's around your boat, just the way it was meant to be seen.

➤ **Dual Spectrum CHIRP Sonar**

In addition to MEGA Imaging, your integrated transducer also delivers Dual Spectrum CHIRP (2D sonar) for long fish arches and better target separation.

➤ **Available On**

ULTREX
with i-Pilot® Link™

ULTERRA
with i-Pilot® Link™

RIPTIDE TERROVA

CONTROL

i-Pilot Link

Riptide Terrova with our revolutionary i-Pilot Link GPS control system.

INCLUDES

RTA-54

Composite Quick Release Bracket

MKA-55

Stabilizer Kit

NEW 87" SHAFT MODEL

Riptide Terrova is a trusted motor with huge innovations that doesn't quit, now available with a new 87" shaft for use on the largest boats in the most extreme conditions. Riptide Terrova packs enough muscle to take you anywhere and comes equipped with i-Pilot Link GPS control system that lets you find, return to, and stay on the fish.

TECHNOLOGIES

POWER, TECHNOLOGY AND RELIABILITY

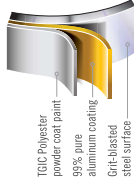

Don't sacrifice toughness for technology. Riptide Terrova packs up to 112 pounds of thrust, and is now available in a new 87" shaft for even the largest boats.

SALT STOPS HERE THE ADVANCED CORROSION PROTECTION OF RIPTIDE™

Coated Lower Units

Riptide lower unit housings are grit-blasted, then coated in aluminum to prevent oxidation and rust. Then, a final layer of powder coat paint provides the ultimate protection.

Fully Encapsulated Electronics

Riptide control boards and circuitry are protected by a layer of marine-grade urethane. And all electrical connections are sealed with liquid-tight heat shrink tubing to keep saltwater out, no matter what.

UNPROTECTED PROTECTED

SPECS

Thrust Level	112
Shaft Length	87" (221cm)
Control	i-Pilot Link Remote
Indestructible Composite Shaft	Yes
Cool, Quiet Power	Yes
Prop	Weedless Wedge 2

WARRANTY

MEGA 360 IMAGING™

MINN KOTA® TROLLING MOTOR MOUNT

SONAR COVERAGE

Get the unmatched clarity and detail of Humminbird's revolutionary MEGA Imaging in a 360 degree view. With a diameter of up to 250' around your boat, you'll be able to view fish and structure like never before, in a variety of fully customizable viewing areas and scanning speeds.

360 Degrees of MEGA Imaging®

FULL USE OF TROLLING MOTOR

Use MEGA 360 Imaging without sacrificing boat control. Whether trolling or using Spot-Lock, MEGA 360 Imaging is independently mounted, so your sonar picture remains unchanged as the trolling motor turns.

Minn Kota Ultrex

Minn Kota Fortrex / Maxxum

COMPATIBILITY

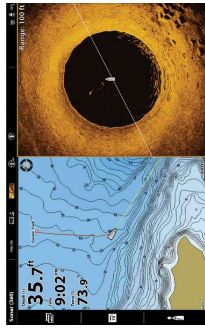

MINN KOTA® TROLLING MOTOR:

- Minn Kota Ultrex
- Minn Kota Fortrex
- Minn Kota Maxxum

HUMMINBIRD® FISH FINDERS:

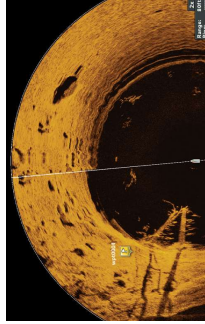

- **SOLIX Series:**
SOLIX MEGA Imaging+ G2 Models
- **HELIX Series:**
HELIX MEGA Imaging+ G3N Models

CUSTOM VIEW SETTINGS

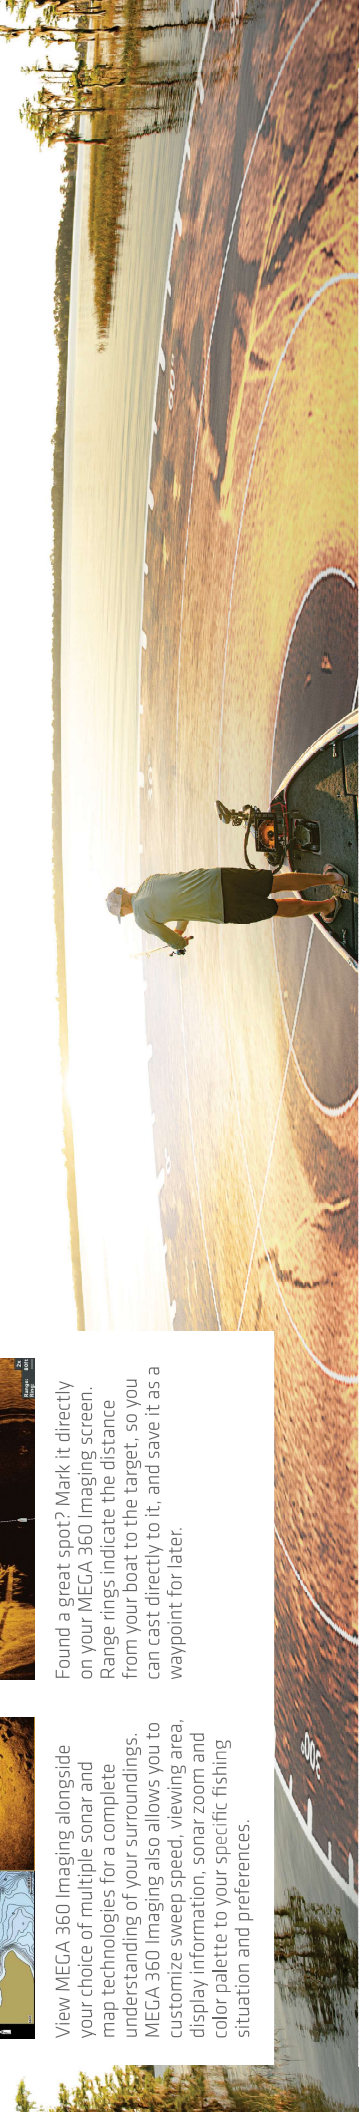

View MEGA 360 Imaging alongside your choice of multiple sonar and map technologies for a complete understanding of your surroundings. MEGA 360 Imaging also allows you to customize sweep speed, viewing area, display information, sonar zoom and color palette to your specific fishing situation and preferences.

MARK AND VIEW WAYPOINTS

Found a great spot? Mark it directly on your MEGA 360 Imaging screen. Range rings indicate the distance from your boat to the target, so you can cast directly to it, and save it as a waypoint for later.

ONE-BOAT NETWORK™

Humminbird® and Minn Kota® share more than just a physical address. We share a passion for fishing and a mission to craft gear that lets you enjoy your time on the water even more. That's why we created the One-Boat Network™: a commitment to make the most advanced fishing gear even better, by making it work together. Our engineering teams constantly look for ways our products can seamlessly integrate and communicate, unlocking more features, capabilities and potential for anglers everywhere.

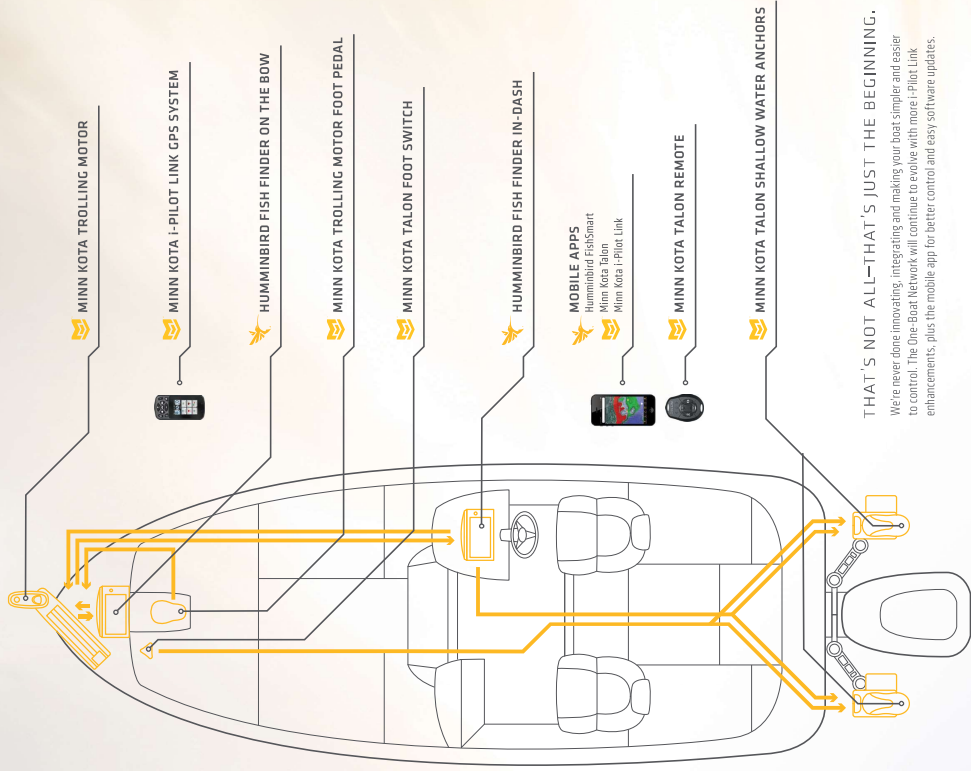

WHAT CAN YOU DO ON THE ONE-BOAT NETWORK?

Nothing beats the clarity and detail of MEGA Imaging™ on your Humminbird fish finder. So we made it easier to get that image to the screen. Now Minn Kota trolling motors with built-in MEGA Imaging™ have a MEGA Imaging™ transducer hoist! right in the lower unit of the motor. No messy wires, more crystal clear images and a better view of the water below that lets you find what you're after.

Hit Spot-Lock on your Minn Kota trolling motor to stay on any fishing spot. If it's productive, close the Spot-Lock using I-Pilot™ Link™. Later, select the Spot-Lock location from your Humminbird fish finder and tell your motor to take you there. Your motor can drive the boat for you, landing you back at your spot so you can fish the honey hole all day long.

When you find your spot, there's no always time to get to the back of the boat. So we worked together to make Minn Kota Talon shallow water anchors controllable from anywhere on the boat. Use the Interact on your Humminbird fish finder, or the I-Pilot Link remote control, to lower Talon, raise it, change anchoring modes and more—no matter where you are.

THAT'S NOT ALL—THAT'S JUST THE BEGINNING.
We're never done innovating, integrating and making your boat simpler and easier to control. The One-Boat Network will continue to evolve with more I-Pilot Link enhancements, plus the mobile app for better control and easy software updates.
