

Racewear Headset - “Bob”

Rugged headset for the serious yacht racer

The Big Blue Racewear Headset, “Bob”, was designed for the serious yacht racer. The DNA of Bob has evolved from his big brother Frank, and is suitable for the harsh conditions of racing but is sleek, fits comfortably and allows the user to wear a range of other sailing accessories.

Do you require reliable communication on the water in all weather conditions?

The serious, everyday yacht racer needs reliable audio communications in all weathers. Bob was designed to be a top performer in all conditions and in the harsh salt-water environment, while still being lightweight, adjustable and compatible with a range of other favourite sailor accessories.

The headset is worn over the ears and behind the head, allowing for sunglasses and hats to be worn simultaneously. It also boasts a latch push-to-talk button, an IP68 rated microphone, and is custom-made to suit sailor connector requirements.

Do you require reliable, rugged audio solutions?

The Big Blue Maritime racewear headset can also be pair with the Diamond Intercom system. The Diamond system is exclusively distributed by Big Blue Maritime, and has been paired with the Big Blue Maritime headset range for sailing, lifeboat, search and rescue and military applications.

The Diamond intercom system and Bob are designed to work together to provide crystal clear communications in the most austere environments, and are the communications solution of choice for premier professional yacht racers, special forces, police patrol and race chase boats. For more information about the Diamond Intercom or our other headsets, please visit the Big Blue website.
