At VETUS, our vision is to be the most trusted onboard marine solutions brand in the world

ABOUT VETUS

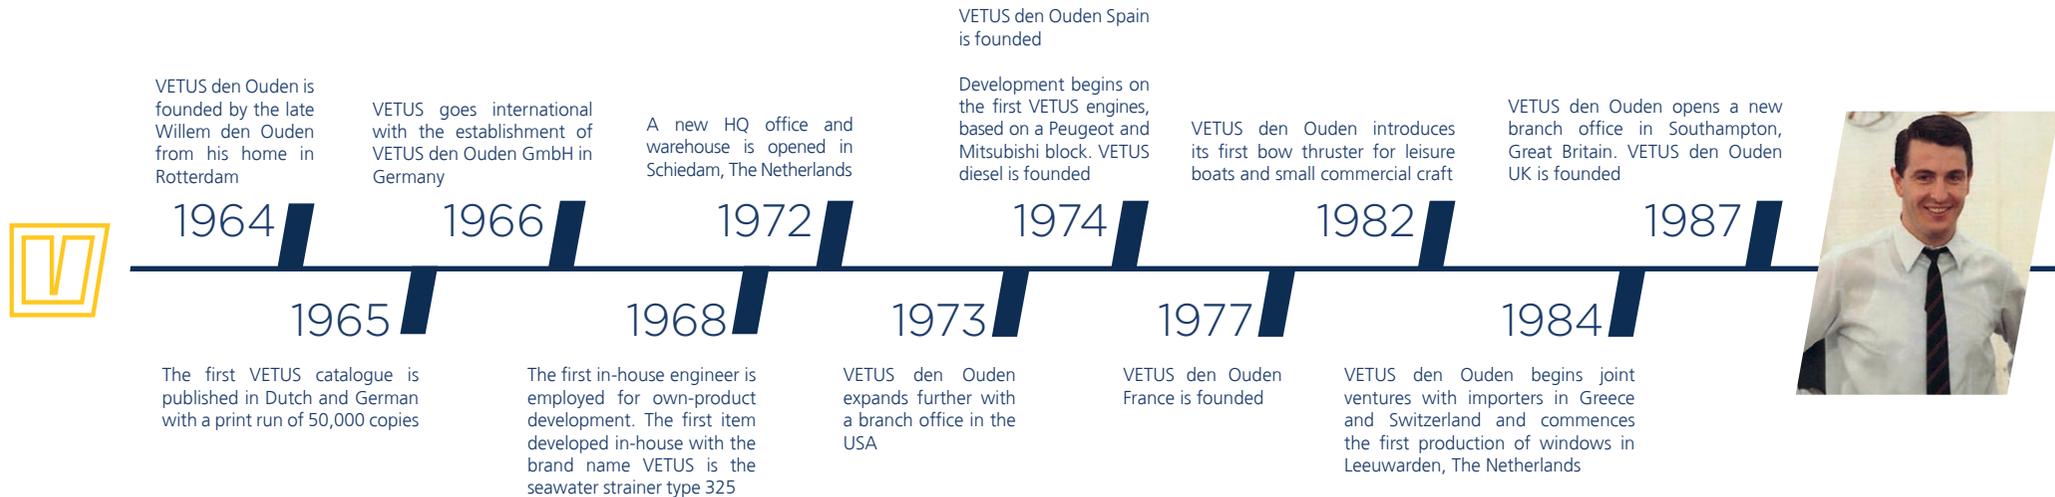

Founded in 1964, VETUS sets the global standard in the design and manufacturing of complete onboard boat systems for recreational and small commercial vessels

VETUS prides itself on innovation and engineers the majority of its 4,000+ product line-up in-house. The company's commitment to quality, reliability, and delivering a superior customer experience has earned the trust of boaters, yacht builders, and marine training establishments all over the world.

VETUS has an unparalleled worldwide distribution and service network. With its headquarters in The Netherlands, direct representation in 18 countries, and distributors in many others, the company can truly call itself a global innovator.

OUR LEGACY

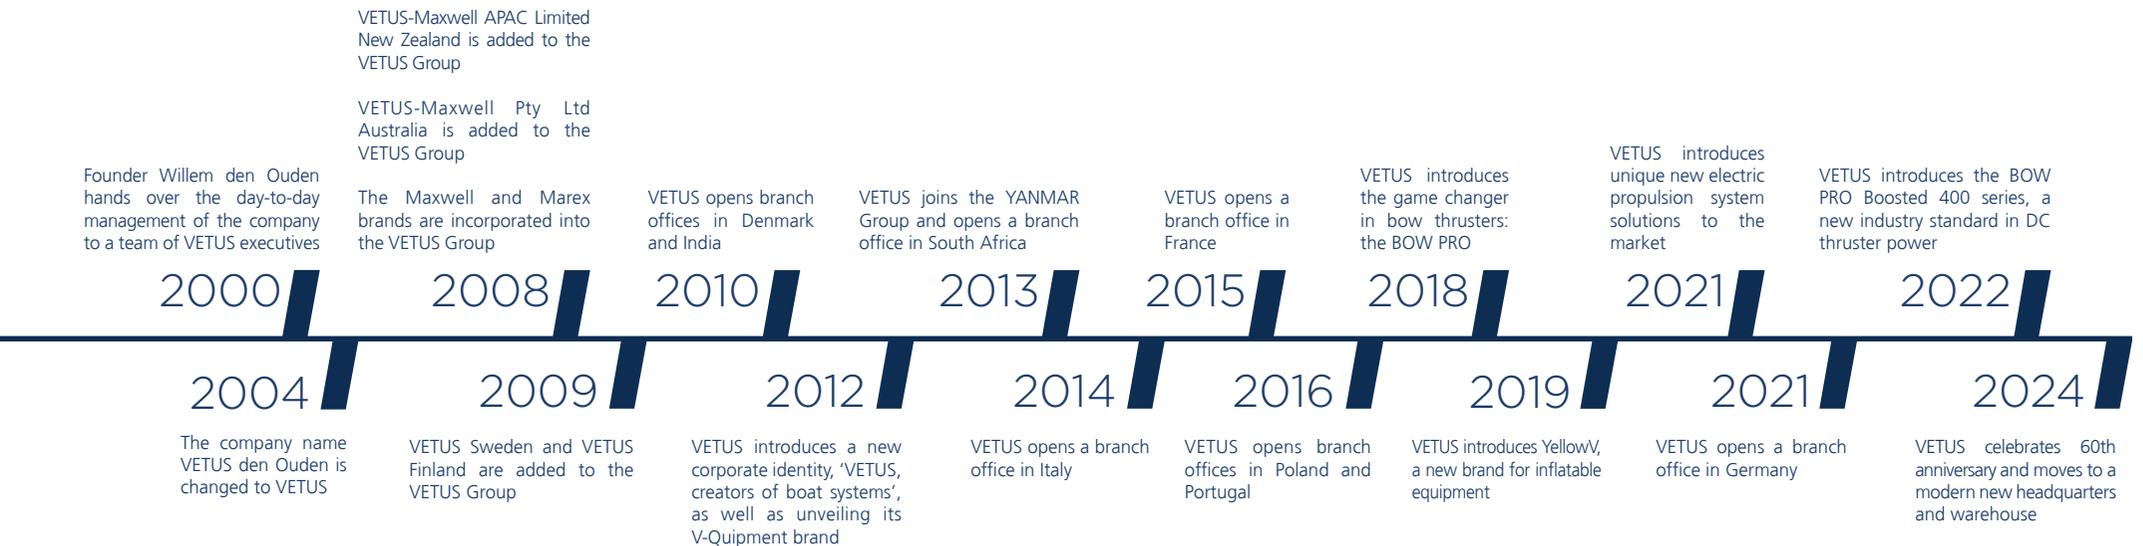

Since VETUS was founded in Willem den Ouden's home in Rotterdam, our company's goal has been to enhance the boating experience with the highest quality onboard boat systems

To illustrate this commitment, just ten years after being founded in 1964, VETUS had already evolved from a local company to a global enterprise, with three international branch offices in Germany, Spain and the United States.

In the intervening decades, VETUS has held onto its entrepreneurial and close-knit family spirit, while becoming a world-leading developer of ground-breaking products for recreational and small commercial vessels.

From a revolutionary wet engine exhaust system in the late 1970s, to the quietest bow and stern thrusters in the world, VETUS has a proud legacy of innovating at the highest level of marine design and engineering.

INNOVATION

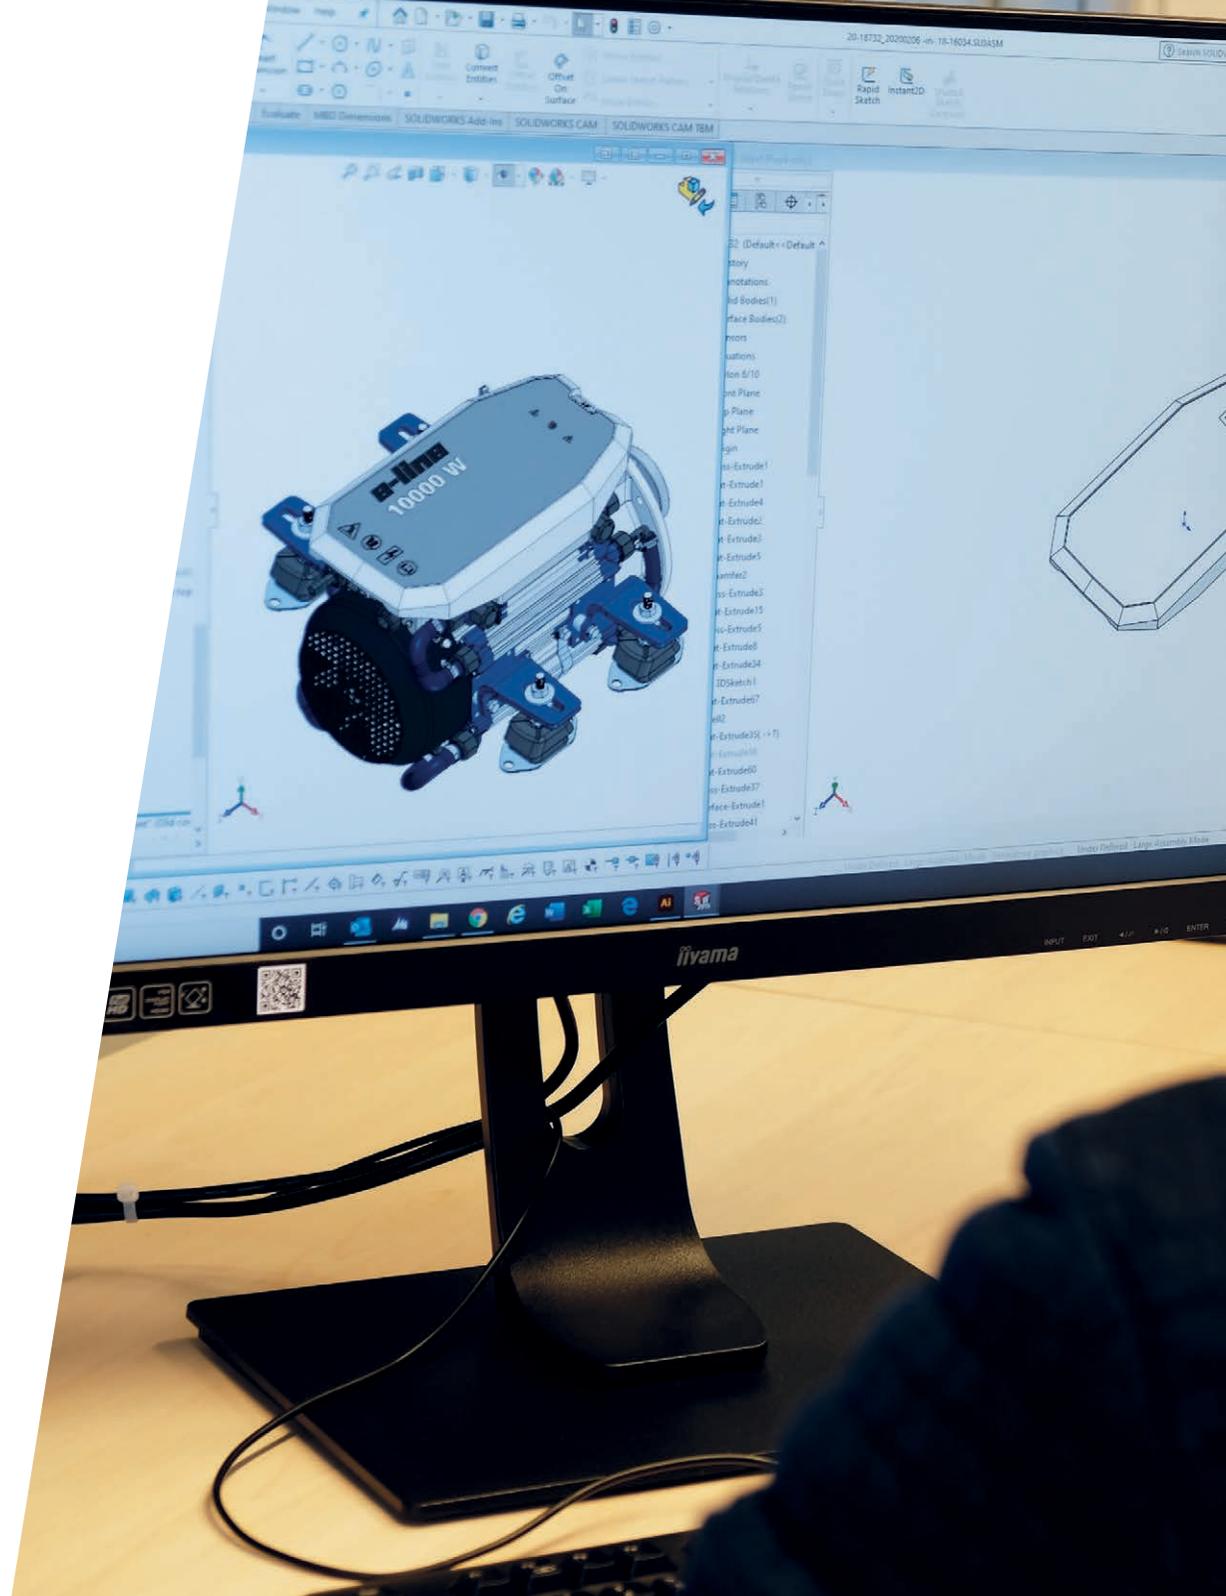

Innovation is at the core of everything we do at VETUS

With a rigorous seven-stage development process, our philosophy is to offer our customers the latest technology using a blend of creativity, cutting-edge research, and testing to withstand the toughest marine conditions.

The majority of our product portfolio has been developed in-house, from the initial idea to the final product. This ensures that every component meets our meticulous quality standards and continues to push the boundaries of marine technology. Our quality management system complies with ISO 9001:2015 requirements, confirming that the application of this management system has been assessed and certified by independent parties.

Our commitment to leading-edge design and development shines through in all our product ranges and system groups. We are proud to have a constantly evolving R&D team at the heart of the organisation – from being one of the first manufacturers to use plastic in marine exhaust systems to our unique E-DRIVE electric propulsion system.

Our goal is to consistently innovate and develop the best boat equipment and engines that exceed the expectations of our customers.

THE PROCESS

1 THE IDEA

An idea is born by combining input from users, market research and newly-introduced innovations in our 'VETUS design lab' – with additional assistance from industry partners, governments and universities.

2 THE CONCEPT

Once a product idea has been developed, we discuss design concepts internally and with a select team of users and use in-house 3D printing to construct tangible models.

3 PRODUCT REALISATION

We incorporate essential product requirements – including ease of installation, robustness, reliability and safety – into the design. Engineers create detailed technical illustrations using 3D CAD modelling to achieve the perfect fit and finish.

4 PRODUCTION

Our engineers work collaboratively with a variety of specialised production partners who are experts in their field, to guarantee the highest quality products.

5 INSTALLATION & USER MANUAL

All products leave the VETUS warehouse with a comprehensive installation manual. Our dedicated documentation department is involved from the beginning to ensure that every consideration – from installation to maintenance – is covered.

6 TEST PHASE

We submit all VETUS products for rigorous tests – for instance salt spray testing – that simulate the toughest of marine environments.

7 MARKET INTRODUCTION

Once a product reaches the VETUS warehouse, it is ready to be introduced to the market via our global network.

We make boating carefree for customers all over the world

OUR PEOPLE

The commitment that our people have to innovation and ingenuity is rooted in our history as a family-owned, -operated, and -oriented company

Our ethos of close working relationships, loyalty to our employees, and unwavering customer service is built around the pride we have in what we do.

The pioneering spirit that we foster at VETUS is crucial to our in-depth manufacturing process. Everything we do is a result of a dedicated and collective effort to create the highest quality boat systems.

Looking into the future of maritime innovation, we know we can rely on our longstanding partnerships, depth of in-house expertise, and the unwavering dedication of our people to lead the industry forwards.

PRODUCT SYSTEM GROUPS

At VETUS we share a common goal: to make your time on the water as satisfying and stress-free as possible. As a creator of complete onboard boat systems, VETUS has a comprehensive range of products, that work in harmony with one another. All our products have been tested under the most extreme conditions, are simple to install, and require limited maintenance to provide the ultimate carefree boating experience.

For more information about our key product groups and the entire VETUS product range, please visit our website or consult our product catalogue.

THRUSTER SYSTEMS

VETUS offers the widest range of thrusters on the market for boat owners, from simple, intuitive models to advanced innovative technologies. All our thrusters take the stress out of docking even in close quarters, crosswinds, and crosscurrents. They provide complete sideways control over the boat while manoeuvring.

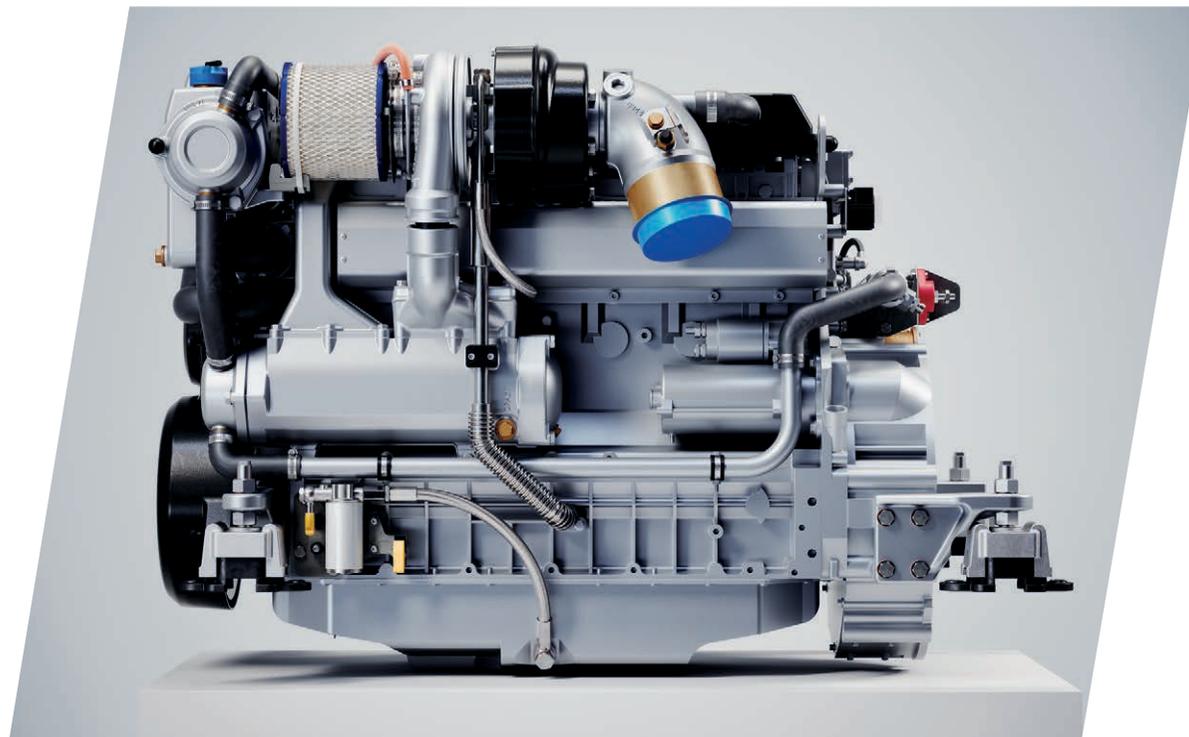

Our in-house R&D team has integrated the latest technologies throughout the BOW PRO range – from full-proportional control to no maintenance on the brushless motor – to give you total confidence under any conditions.

DIESEL ENGINES

Whether you own a sturdy two-cylinder with saildrive or a whispering six-cylinder, you can rely completely on a VETUS diesel engine. To complement each marine engine in the range, VETUS also offers a complete package of 'around the engine' products: from engine remote controls and fuel filters, to the propeller shaft and exhaust system.

The owner of a power or sail boat with a VETUS engine can enjoy every moment on the water, just as boating should be!

EXHAUST SYSTEMS

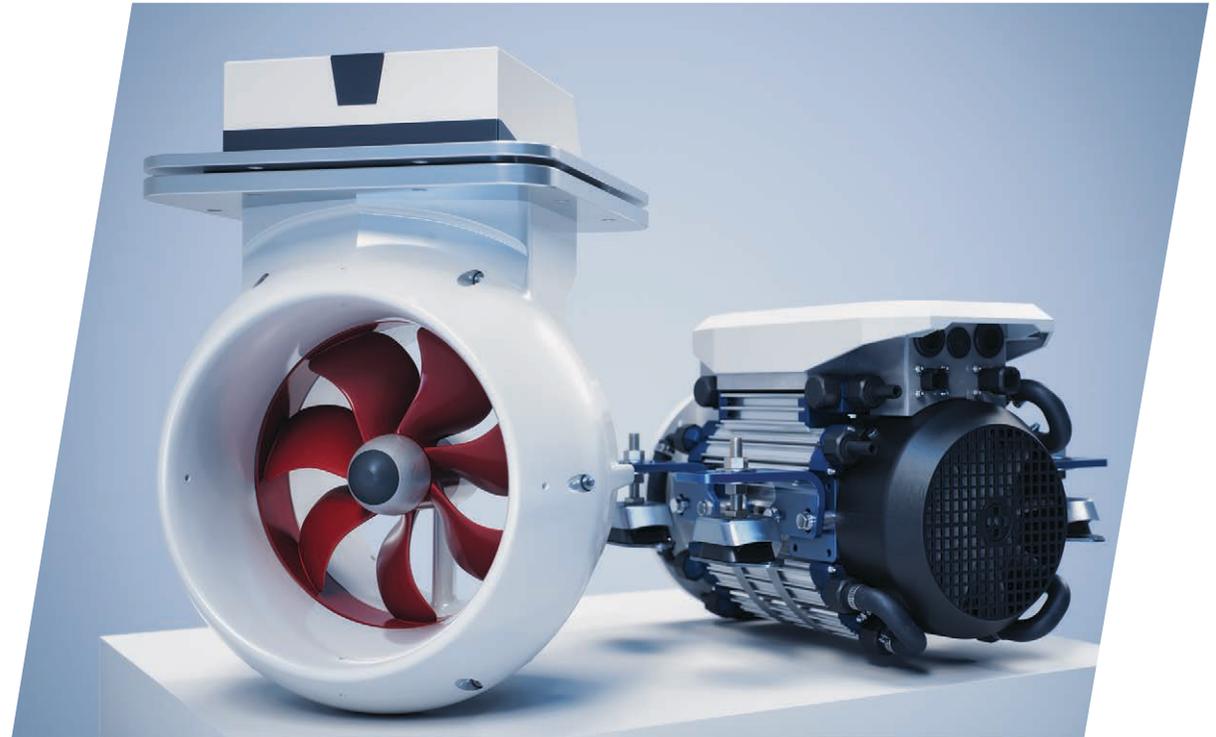

VETUS has been a pioneer since 1979, when our lightweight plastic 'wet' exhaust system revolutionised marine exhausts – a design which is still widely used today. Our exhaust systems are designed with resilience, usability, and simplicity in mind, using materials optimised for use in marine systems to help you enjoy life on the water. And by adding the extra feature of rotatable connections, you get the feeling of a custom-made exhaust built-in.

Our exclusive polymer blend, NAVIDURIN®, has been awarded Lloyd's Register certification. It offers outstanding durability and heat resistance with a heat deflection temperature of over 250°C. Using this proprietary material allows us to create incredibly lightweight, robust, and cost-effective exhaust systems without compromising the VETUS standard for quality craftsmanship.

E-DRIVES

Twenty years after the release of the EP2200 electric system, VETUS E-DRIVE systems build on our expertise in silent, powerful propulsion. The E-DRIVE system is a package of different modules, which bring peak performance with only the sound of the water. Thanks to cleverly applied cooling, our E-DRIVES can operate for up to a full day on one charge, utilising the maximum range of the batteries and efficient power from the motor.

The E-DRIVE electric boating solution is an all-in-one solution that is compact, plug-and-play, and suitable for both new and existing vessels, so you can sail in silence with no limitations.

MAXWELL
ANCHORING EXCELLENCE

ANCHORING SYSTEMS

Maxwell products are renowned for their reliability and performance throughout the international marine leisure boat industry. Its range of windlasses, capstans and accessories is extensive, providing anchoring solutions for vessels from 6 metres (20 feet) to over 125 metres (393 feet).

Thanks to decades of development, the company has gained a reputation for quality and reliability, and truly earned its position as market leader. With advanced engineering features incorporated throughout an extensive range of anchor windlasses, you can rely on Maxwell to secure your investment.

Our mission is to engineer reliable systems backed up by unparalleled global support

CREATOR OF BOAT SYSTEMS

Our products are crucial to our customers' boating experience. We design and develop our solutions in-house using the best engineering resources, and work in partnership with leading boat builders and marine training establishments. Through an unwavering commitment to product quality and unparalleled support, we endeavour to earn the trust of our customers.

MAXWELL
ANCHORING EXCELLENCE

ANCHORING EXCELLENCE

Since 1969 the name Maxwell has been synonymous with the highest performance standards in anchoring solutions for pleasure boats, superyachts, and commercial vessels. Our international reputation for excellence has evolved through ongoing R&D, innovative design, customer service, and a commitment to style and quality that is unrivalled in the industry.

V-EQUIPMENT

THE BEST EQUIPMENT FOR YOUR BOAT

V-Equipment gives you high-quality, reliable and affordable boat products, which all complement our VETUS boat systems. Tested and approved in the VETUS lab in Schiedam, The Netherlands, all V-Equipment products carry a three-year warranty.

MAREX

CUSTOM-MADE BOAT GLAZING

A leading manufacturer of custom-made boat windows, with decades of experience in the industry, Marex stands for quality, innovation, and stylish design. Our products are independently certified to comply with the Recreational Craft Directive and applicable ISO standards, providing peace of mind for our customers.

YellowV

TAKING LEISURE ACTIVITIES TO THE NEXT LEVEL

Started by a group of young enthusiasts within VETUS, YellowV aims to make watersport accessible for everyone. Our products enable you to get out on the water, enjoy nature and live life to the full. We offer a growing product range for both flat- and white-water activities that surpasses industry standards and regulations.

SERVICE AND WARRANTY

At VETUS, we want you to enjoy life on the water and make every moment count. We also want you to have confidence in your boat and the equipment on board.

Creating a carefree boating experience comes not just from manufacturing reliable, high-quality components and equipment, but also by providing industry-leading service and support to our customers. It includes a world-beating warranty* – three years on all equipment, five years on engines. When a VETUS engine is purchased with a complete VETUS around the engine package, the warranty on equipment is extended to five years as well. VETUS also provides a worldwide service network, so that our customers know they can count on outstanding support wherever they are.

*Conditions apply

GLOBAL NETWORK

Our strength lies in the expertise of our worldwide network, staffed by professionals with an unmatched collective breadth of leisure sailing experience. With a direct VETUS representation and distributors spread across all five continents, we are proud to provide the same industry-leading VETUS products, service and support wherever you are in the world.

YANMAR MARINE INTERNATIONAL

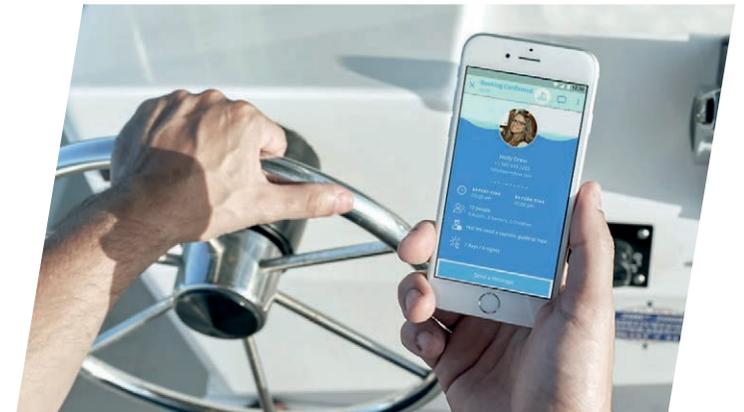

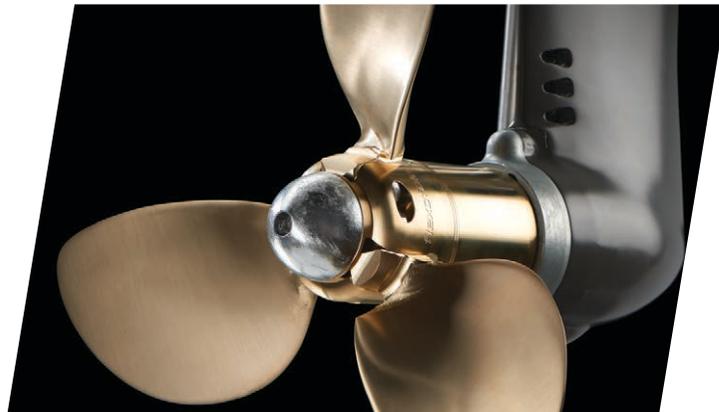

VETUS has been a proud member of YANMAR Marine International (YMI) since 2013. Both companies share the same philosophy of listening closely to the needs of their customers, and have decades of engineering knowledge and experience, and extensive sales and service networks around the world.

YMI supplies the world's cleanest, most efficient, reliable, and durable diesel engines for the recreational sector – both sailboats and powerboats – and light-duty

commercial applications. Its trusted range of common rail marine diesel engines encompass an output range from 40 hp to 640 hp – the most comprehensive offering available from any marine engine manufacturer.

Committed to the development of advanced technology for the best and most sustainable solutions to meet the evolving needs of boat owners and OEMs, YMI's mission is to enhance the entire boating experience for all its customers.
