# HYDROSTATIC TEST SERVICES

## GAS CYLINDER HYDROSTATIC TEST

We also offer for ship owners sector operators a new hydrostatic test service for firefighting systems cylinders.

Our service includes:

- Gas transfer and recovery
- Complete system disassembly
- Complete valve inspection
- Hydrostatic Test
- Complete assembly of the cylinder
- Gas refill with recovery pump and addition of the missing or lost gas
- Hydrostatic Test certificate issue
- Replacement of damaged parts/ spare party supply

## HIGH ECONOMICAL BENEFIT

SOLARI offers for retailers, companies and individuals a new service for ten-years gas cylinder hydrotest at its warehouses situated in Civitavecchia (RM), Orbetello (GR) e Pontedera (PI). Our new unit for hydrotest of fixed gas firefighting systems (FM200, Novec 1230, Argonfire, etc.) enable us to transfer and recover a large percentage of gas. This process make the gas cylinder hydrotest faster, more practical and cheaper and gives to our customers and partners a significant economic advantage compared to the purchasing and installation of a new firefighting system.
