PASSPORT 50

BUOYANCY AID

Created for a wide variety of recreational watersports, including paddling and sailing, our designers have not only focused on fit and form, but the Passport 50 Buoyancy Aid also packs plenty of storage into a streamlined package.

Equipped with two zippered pockets, essentials, such as phones and keys, are always accessible. Finding the right fit is easy with five size options ranging from junior to adult XL, and the accompanying torso adjustments further customize the wearer's comfort. This new PFD design significantly reduces snag points, enhancing safety and efficiency while maneuvering in, out, or around vessels.

We've optimized this PFD for convenience and protection so paddlers and sailors can feel confident exploring the water.

- Two zippered accessory pockets secure essentials
- Lightweight design and padded shoulders for all-day comfort
- Elasticated side panels for a secure fit
- Twin side adjustments to customize fit
- Webbing management to reduce snagging
- Unique back panel arrangement for branding and personalization
