PAVING THE WAY
FOR YOUR MARINA PROJECTS.

METALU

EXPERTISE and EXCELLENCE

SINCE 1974, WE HAVE BEEN SPECIALIZED IN THE DESIGN, MANUFACTURE AND INSTALLATION OF ALUMINIUM MARINA STRUCTURES IN FRANCE AND THROUGHOUT THE WORLD.

We support our customers throughout the entire project, from the preliminary stage, during the design phase and throughout the life of the product.

Our engineering department develops customized solutions in order to meet the specific needs of each customer, in any location and no matter what the requirements.

Our factory handles the cutting-edge processes needed to see projects through from manufacture to installation.

Our products are regularly verified by official inspection agencies.

Innovation is a key driver of our growth, allowing us to continuously adapt our solutions to changing regulations or land use and planning issues.

Finally, the quality of our work is recognized worldwide. Our international organization leverages the expertise of our offices, agents and installers operating in many parts of the world, including Europe, Russia, Africa, the Middle East and Asia.

Whether for a dock or marina, an access gangway, a bridge or a special project, our team is always here to advise you and help you in completing your project.

We are strongly committed to providing excellent customer service.

MARINAS

MARINAS & DOCKS

AROUND THE WORLD, WE DESIGN, CUSTOM MANUFACTURE AND INSTALL ALL TYPES OF ALUMINIUM STRUCTURES FOR PORTS AND MARINAS.

We can create, expand or redesign public and private marinas.

Our expertise also extends to the creation of river and lake marinas or moorings.

We manufacture floating and fixed docks with access gangways, as well as commercial docks for any type of craft, up to mega yachts.

METALU

MARINAS & DOCKS

WE HAVE A GLOBAL VISION OF THE PROJECT FROM START TO FINISH, INCLUDING PROVIDING ACCESSORIES AFTER INSTALLATION.

We work with a wide range of anchoring systems, to solve any problems associated with tides, lowest water levels, sea bed types and bank shapes.

Our structures are designed to withstand weather conditions even in high stress environments such as cyclone zones.

GANGWAYS & BRIDGES

WE HAVE ALSO LEVERAGED OUR EXPERTISE
WITH ALUMINIUM TO SPECIALIZE IN THE
CONSTRUCTION OF FIXED AND FLOATING
GANGWAYS:

- fixed aluminium overpasses,
- floating aluminium gangways for rivers, recreation centres and more,
- automated floating walkways that open and close.

WE DESIGN EACH PROJECT
WITH AN EMPHASIS ON SAFETY
AND AESTHETIC INTEGRATION
INTO THE ENVIRONMENT, IN
COMPLIANCE WITH CURRENT
LOCAL STANDARDS.

SPECIAL PROFESSIONAL USE

WE OFFER A RANGE DEDICATED TO SPECIAL AND PROFESSIONAL USES, FROM FLOATING RESTROOMS, FUELLING STATIONS AND HARBOUR MASTER'S OFFICES TO COMMERCIAL PORT EQUIPMENT, MOORING WALKWAYS, PILOT DOCKS AND MORE.

Finally, we also serve private and community projects with our modular range of docks and walkways specially developed for sports facilities and private facilities, for use with all types of craft, anchoring systems, configurations and accesses.
