

# DECIDAMP® CLA CLS

CONSTRAINED LAYER VIBRATION DAMPING TILE

---

**NEW  
PRODUCT**

50% HIGHER DAMPING  
PERFORMANCE

10% LIGHTER  
THAN COMPETITION

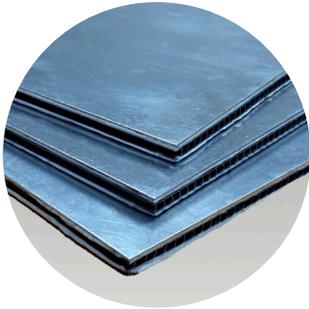

JUST PEEL 'N STICK  
TO INSTALL

LIGHTER • BETTER • EASIER

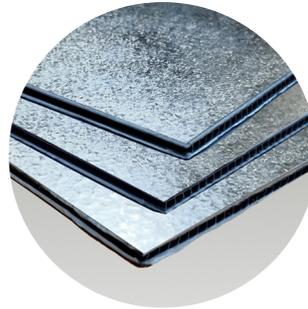

---

LUXURY YACHTS DESERVE  
THE LUXURY OF SILENCE.

**DECIDAMP® CLA**  
ALUMINIUM OUTER LAYER

**DECIDAMP® CLS**  
STEEL OUTER LAYER

*Decidamp CLA and CLS are engineered to effectively reduce internal noise and vibration in structural elements of vessels - bulkheads, deckheads and hulls and other marine applications.*

## OUR ADVANTAGE

- Lightest composite damping tile available on the market.
- Acoustically outperforms similar products by 50%.
- Flexible, making it easy to conform to curved or odd shapes.
- High bond strength to all metals and composite polymer substrates (FRP).
- Easily installed, making it the most cost-effective damping product on the market.
- Available in various constructions to treat various substrate thicknesses.
- IMO tested & certified\*

\* Test report pending

**EMBARK ON  
A SILENT VOYAGE  
WITH PYROTEK**

Pyrotek® - a well-trusted name for innovate acoustic solutions with over 50 years of noise control experience, world-class manufacturing technologies, advanced research and development. We constantly improve existing materials and develop new ones for the most challenging marine environments: from reduction of unwanted noise generated by engine rooms to unpleasant vibrations and noise transfer through cabins. Extensive testing and real-time use around the globe have proven the significant lifetime performance of Pyrotek products over rival manufacturers. Our world class team of engineers and scientists bring a wealth of knowledge and experience to reducing noise and thermal protection in demanding and challenging environments. Our products are internationally certified and our extensive portfolio includes vibration control, noise barriers, sound absorbers, composites, thermal and passive fire protection, and specialty services.
