

OUR CLIENTS SAY

"For us it's important to offer our customers different alternatives. Flexiteek has proven to have the high quality that we want for our boats."

Benny Martinsson managing director and
owner of Nord West Yachts.
IBI PLUS 2010-12-17

"When we partner with another company we want our partner to be the leader within their industry and Flexiteek is just that. Flexiteek has helped to make out boats look more luxurious and it has helped us to set our brand apart from the rest."

Pat Wiesner – V.P. of Engineering
Regal Marine 2011

BENEFITS WITH HAVING A FLEXITEEK DECK:

- Flexiteek is the original synthetic marine decking and a patented product world wide.
- Flexiteek is the market leader of synthetic marine decking.
- Flexiteek does not require sealing or difficult ongoing maintenance.
- Excellent non-slip surface. Wet or dry, Flexiteek provides amazing grip in the toughest conditions (ASTM D 4518).
- Flexiteek does not turn grey or fade.
- Stain resistant, soap and water will remove most spills easy (oil, fuel, red wine, fish blood etc).
- UV tested (ASTM G 154-00) and proven UV resistant.
- Welded system without adhesives which provides a deck that is waterproof.
- No screw holes- Flexiteek and the glue will work as a sandwich construction on your boat.
- Reduces sound and noise up to 11 db.
- Low combustibility (Flammability tested to AS/NZ 53837).
- Flexiteek comes with a 5 year material guarantee.
- All Flexiteek products are recyclable.
- Flexiteek has earned the respect of boat manufacturers for its high quality. Check out our webpage for more information on our reference section.

WHERE TRADITION ENDS

FLEXITEEK

THE ORIGINAL

Flexiteek is the original synthetic decking material and market leader in their field since 2000. Flexiteek always have and will continue to strive for excellence. We learn through experience and pushing the boundaries. It is this commitment that keeps Flexiteek at the top of their game.

FLEXITEEK LASTS!

Flexiteek is made of composite materials, 100% recyclable in to other products and its non-slip quality is superb. Nobody, yet, on first viewing or touching think it is anything other than real teak. You can enjoy your beautiful deck instead of worrying about maintenance and poor quality.

Tradition is about the end...

TEAK IS BEAUTIFUL - IN THE RAINFOREST!

Teak, *Tectona grandis*, has always been used for decking on boats. It looks beautiful but requires lots of maintenance to keep it that way. Fast plantation grown teak has a lot of soft fiber and doesn't last long. The best teak comes from the rainforests of Burma; these are now under protection due to the large exploitation and devastation of teak during the last century. Flexiteek is a product that can fill the need for teak but without exploiting our worlds beautiful rainforest.

Tradition is about to end...

With nearly 200 000m² of Flexiteek sold, we have "saved" 2400 cubic meters of teak on the assumption of replacing 12 mm quality teak.

TEAK IS LIMITED - WE'RE NOT!

Teak comes in 3 colours.. New teak colour, grey after it's been outdoors for a few months and then a light teak once you've spent hours scrubbing it! Then back to grey again! Flexiteek comes in the same colours to mimic the teak, however unlike teak Flexiteek stays the colour you choose without the scrubbing and endless maintenance. But we are not restricted by nature! How about a black plank? For your modern RIB or a White plank with grey caulking for your heads or, even, your bathroom at home...

With Flexiteek you can be sure that we will continue to innovate and meet the challenges set by our customers.
