

Comfortis® Nautical Seating & Bedding

5-star Quality

Test Samples Quality

To ensure that our expertly made mattresses meet our client's specific requirements at all time, we offer our clients a Try-out box what allows them to try the comfort densities and of the slat system & mattress out, so that our client can determine their preference & that we ensure a full customer satisfaction with the products supplied.

5-star Quality

Comfortis® works upon a 5-star quality on all made products. We work globally as full sleep comfort supplier.

Manufacturing location

We manufacture all products in our manufacturing facility in Warns The Netherlands. Our skilled craftsmen are supported by up-to-date technology. We use only the finest materials.

We specialise in producing the highest quality:

- Mattresses
- Slat bed base
- Bed linen
- Interior Seating
- Exterior Seating
- Leather interior panels
- Bed surroundings
- Headboards

Comfortis® specializes in custom-made mattresses & slatsystems supplies pure craftsmanship for every situation and for every location. We know the wide range of wishes and requirements for owner's cabins and crew. Mattresses and the accompanying bedlinen, are supplied by us uniquely labelled & numbered. Since we make all our mattresses in-house, we can meet all practically individual preferences and special material requirements.

The specific properties of each mattress are mainly distinguished by the choice of foam used in producing the mattress.

Each type of foam offers different advantages, depending on the needs and requirements of the prospective mattress owner.

Our quality range consists of seven individual product lines: the Standard-line, Comfort-line, De Luxe-line, Tender-line, Custom-line, Executive-line and our Distinct -line.

All mattresses are custom-tailored to fit berth configurations of every shape, size and quality. Comfortis® expert service team visits the client's yacht for obtaining precise measurements of the contours of each sleep system, that to ensure full customer satisfaction with the products supplied, the Comfortis® service team is globally active.

sleepshape® Standard

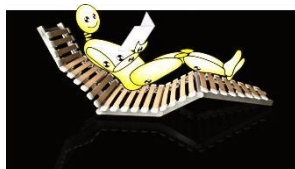

Sleepshape® Standard is the click&roll system what is highly flexible and offers perfect access to any built-in storage hatches under the mattresses. With in seconds to dismantle or simply to roll up this slat bed base. The Sleepshape® Standard consists of narrow beech wood slats that are arched for greater resilience, successfully developed as a perfect support system for mattresses in all berth configurations. Sleepshape® Standard ensures continuous airflow under the mattress, preventing the formation of mildew and eliminate odors. It keeps your mattress clean.

Sleepshape® Gold

Is a revolutionary patented, electrically operated slat base system with bowed laminated 8-mm thick beechwood slats that can be fitted into practically every shape of bed. Spring-supported & hardness-controlled over the entire resting surface. It is supplied with infrared remote control and emergency manual control, so that the system can be operated by hand if there is a power outage. The total installation height is only 90mm. It is the ultimate system for under a mattress in terms of comfort.
