

COMPLETE CARBON/VECTRAN TRAPEZE with Guys & Carbon Spreader Bar

Based on the best selling Exit Carbon Fibre Spreader Bar, the new Trapeze is made with high tech 4 mm Vectran ® lines and has fully adjustable Lateral Guys.

The main lines are 4 meter long, to avoid interference even when the gangway is installed on a lower dock.

All ends are fitted with Stainless Steel Carabiners for high speed assembly.

Lateral guys are fitted to the boat through high tech Vectran ® lous, and their length can be finely adjusted using the supplied Blocks with V-Cleats.

Weight

Reduced thanks to the new exclusive polymer ends.

Trapeze with Carbon Spreader Bar, Stainless Steel Ring and Carabiners: 280 g

Twin Lateral Guys with Spectra lous, blocks with V-Cleats, and Carabiners: 340 g

Total weight: 620 g

Use of the trapeze (halyard)

Suitable both for sailing and motor yachts

The trapeze is attached to the mast then comes the stainless steel ring, the spreader bar keeps the guys (Vectran ® adjustables ropes) divided.

The guys have to be attached to the pad eyes of the gangway (on dock side).

Pad Eyes for attaching the guys

Trapeze on Sailing Yacht

**No more noise from rolling wheels.
No more worries about your Carbon Gangway hitting something on the dock.**
