

Man over board!

What would you do to quickly and safely rescue the mob?

M●B RESCUE LINE

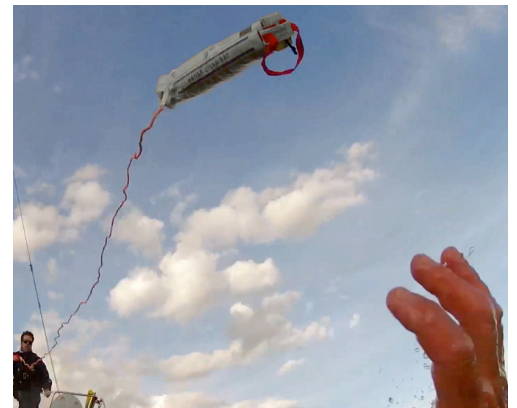

is the device to quickly reach, secure, and help a person out of the water.

The double bands / handles makes it easier for the person who saves to pull and lift the man over board to safety on board.

Stored in the outer bag & quickly ready for action

Total length 30 m approx.
Bag and rope float.

Secure!
The man over board pull out the webbing sling and put it around the body and tighten the buckle.

Easy to throw even against the wind.

The handles and sling makes the difference!
