

TILLMAN DOMOTICS

Redefining Home Automation

TECHNOLOGY IN THE KITCHEN – TILLMAN DOMOTICS OFFERS BESPOKE SOLUTIONS

Providing clever solutions in the kitchen is part and parcel of what a good AV specialist can do. Tillman Domotics created a TV for this kitchen island that pops up and swivels, allowing the cook to watch whilst preparing the food and carry on viewing as dinner is served at the table area of the island unit. For more formal occasions, the TV can be discreetly hidden below the countertop. The lift mechanism is operated at the touch of a button from the iPad or wall-mounted touchscreen and is almost silent. The TV's stainless steel back-plate is also custom designed to stop the fat from the sausages getting into the TV.

**Tillman Domotics, 8 Square Rigger Row, Battersea, SW11 3TZ, www.tillmandomotics.com. T: +44 (0) 20 7078 9302.
