

Manage your boat, track your cruise, register your maintenance
www.i-captain.com

OUR PASSION FOR THE SEA

Holonix has strong competences in **The Internet of Things (IoT)** and the **data management** in complex systems.

...

Combining our know-how with our growing passion for the leisure boat industry, we have conceived a tool easily accessible from any device, **i-Captain**, designed for **boaters** and **captains 2.0**

i-Captain

The Personal Boat Management System

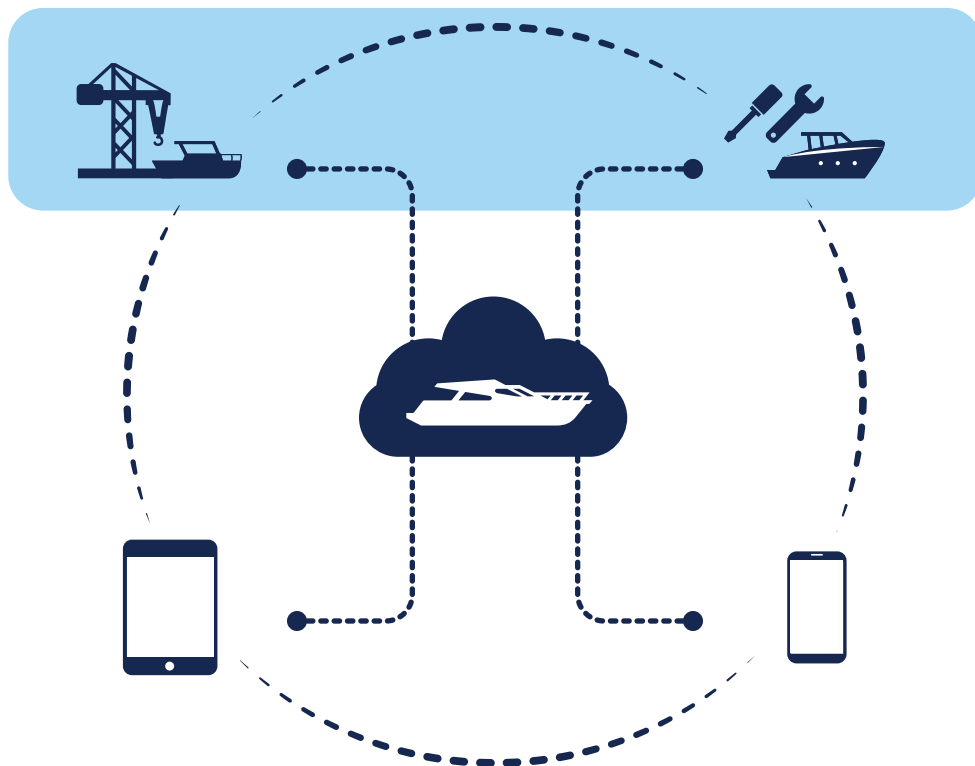

Keep always in touch with your boat, access all the information of your boat profile, navigation data (captured by the Marine Sensor Gateway) and main onboard equipment securely stored on the cloud, just using your smartphone, tablet or PC.

Create your personal boat **avatar** on **i-Captain**, improve your knowledge, expertise and skills on boating and above all **enjoy sailing!**

| “LIKE” us on Facebook |

SENSOR MARINE GATEWAY

Make your Boat fully connected

The Sensor Marine Gateway is a single board system to be installed on the boat. Through embedded sensors, usage data will be acquired and transmitted via mobile networks to your i-Captain account. I-Captain is the first web app to handle the boat and its entire lifecycle on the cloud. I-Captain allows you to manage the historical data from sensors, maintenance, contact with the shipyard and the winter storage, all in a single and optimized integrated approach.

Shipyard

Stay in touch with the shipyard, get technical details and additional information, stay informed about the recall, the changes, the suggestions for use and maintenance

Automatic logbook

Record automatically your routes, register your navigation data, add your notes and finally create your cruises

Geo-Fencing

Keep an eye on your boat when it is at anchor or harbour. Set your fence, i-Captain will look over your boat sending an alarm if it is moved

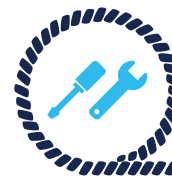

Maintenance management

Manage your “do it yourself” as well as professional maintenance activities keeping track of what has been done, when, by whom, with also pictures, attachments and all what is needed

Winter Storage

Do maintenance knowing the hours of sailing, the maintenance's history, the shipyard's suggestions and the boat's report. Sail safely, increase the reliability and the resale value

Crash detection

Keep under control accelerometer data, check it before and after the crash event, evaluate the crash severity and improve your safety

On-board equipment monitoring

Plug your on-board equipment with the Sensor Marine Gateway, capture, transmit and record usage data and enjoy a trouble-free boat ownership

Report

Retain the value of your boat, having a full history of its use and maintenance, keeping safe your boat investment

CONTACTS

Holonix S.r.l.

Tel: +39 0362 1582033

Tel2: +39 0362 1582029

E-mail: info@i-captain.com
