PROFESSIONAL

WORKVEST FOR FISH FARMING

Developed and produced at the request of - and in cooperation with the fish farming industry.

SEAFARMER 50N

Floataction vests are used when working on fish farms which requires high demands on functionality and usability. Fixing possibilities for VHF radio is a key element for companies with focus on safety for its employees. Our references include Marine Harvest.

The floataction vest has high visibility due to the fluorescent yellow colour of the outer fabric. Convenient and flexible in use. Buoyancy material in self-extinguishing PVC.

 Size 70kg+
Colour: Fluorescent yellow

WORKVEST FOR DEMANDING OPERATIONS

Combines rigid and inflatable buoyancy, a hybrid solution!

SEARESCUE HYBRID 225N

SeaRescue Hybrid is developed in close cooperation with professionals working in demanding operations i.e. on deck of wessels, on installations, at seafarms etc.

The outer cover (PVC) and fabric(nylon) is made in a high visibility colour.

The lifejacket is equipped with inspection window for easy daily control of the inflator. Pocket for VHF- radio. Also available with a hole in the back for fitting of safety hook (harness). Total buoyancy of 55N+170N.

WORKVEST FOR EXPOSED ENVIRONMENT

Regatta Workvests are comfortable and have excellent mobility due to soft buoyancy

WORKVEST 401

Developed and produced at the request from the Norwegian Petroleum Directorate (NPD) for use in exposed situations. Comfortable and have excellent mobility due to soft buoyancy with self extinguishing PVC with closed cells. Hole in the back for fitting of harness, anti flame outer fabric and solid lifting straps on shoulders (2x1600N). Crotch straps mounted, pocket for light on the front, equipped with 6 SOLAS reflective tapes and whistle.

WORKVEST 402

Workvest 402 is developed as a request for work in exposed situations; decks, installations at sea, welding, maintenance and scaffolding work. Among our references are - Philips Petroleum, Shell, Total, Elf and Maersk. The Workvest 402 fulfill the requirement for a lifejacket, with soft buoyancy of self extinguishing PVC with closed cells. The outer fabric is anti-flame and gives high visibility due to orange fabric with 6 SOLAS reflective tapes. The lifejacket has a hole in the back for fitting of harness, crotch straps, solid lifting straps on shoulders, pocket for light and whistle.

ANTI-FLAME fabric

WORKVEST 403

In the following of the accident at "Åsgaardfeltet" in 1999, Regatta started the development of the product Workvest 403. The intension was to design a product with a 59N floatation vest combined with an 160N inflatable lung to achieve a inherentet buoyancy of 219N. The advantage of having the floatation vest is also to protect the body against a possibly fall and to keep you warm. This combination gives the vest a higher buoyancy and provides a better floating angle and quickly turn in the water. This combination also provides extra protection when carrying a heavy tool belt. Requested by the Norwegian Petroleum Directorate (NPD)

FLOATATION BIB FOR FISHERMEN

A comfortable, light weighted and functional bib

REGATTA FISHERMAN

Fishermen have had an important role in the development process to secure that the garment fulfil the demands for comfort and functionality. Emphasis on design with ideas from sports- and leisure clothing as well as regular floating garments. The floatation is built in the upper part of the bib and the product is an approved buoyancy aid.

Regatta Fisherman consists of jacket and bib made of wind- and waterproof outer material in PVC-coated polyester. No external details to be hooked in equipment during a working operation. The suit has a functional grey colour on exposed areas and a fluorescent yellow colour for high visibility. Can be equipped with a knifepocket and kneepads, accessorie.
