## PREDULON 00

---

Pre-treatment for Dulon 1&2 system

### DESCRIPTION

Highly concentrated detergent/degreaser to be used as pre-treatment before applying DULON 1&2. It removes surface dirt and grease, oil, old wax and silicon traces and creates the necessary basis for the DULON 1&2 protection system. Also to be used as pre-treatment with other DULON MARINE wax- & polish products.

### HOW TO APPLY

Add 250 ml of PREDULON 00 to a bucket of warm water. Wash the surface with sponge or soft brush. Leave to work for 30 sec. Rinse with fresh water. PREDULON 00 (500 ml) treats a 10-15 meter vessel.
