passion

from design to excellence

An aerial photograph showing two boats on a body of vibrant turquoise water. In the upper left, a smaller boat with a white cabin and a tan hull is moving towards the right. In the lower right, a larger, more detailed motor yacht with a white hull and a tan deck is moving towards the left, leaving a white wake. The background features dark, jagged rock formations with white foam from the waves crashing against them.

Alongside the most notable brands in sailing, since our creation..

Partner to the largest international rental fleets, NV outfits Sunsail, Moorings, Kiriacoulis, Dream Yacht Charter, ...

Focused on customer needs in "multibrand" products, NV is also present in specialist European retailers for original and after-market equipment.

Expertise in Industrial Customisation.

Each project is designed to take account of the environment and the ergonomics of movement onboard, and the functional needs and purpose of the boat.

CAD and virtual reality are used to refine the design, innovate and ensure perfect accuracy in terms of the model and the style.

Production is organised to meet worldwide demand from manufacturers and specific boat builders.

NV provides each of them with technical support, reliable deadlines and qualified after-sales with traceability of the arches and covers manufactured in our workshops in western France.

Services specific to each project:

Customised logistics solutions to meet the specific needs of our international customers.

Flexible materials workshop:

several production lines, harmony in colours, to reveal the personality of your boat.

Mechanics workshop:

welding, polishing, cutting, bending...

External Logistics Platform:

Storage of raw materials and finished products before shipping.

We share your **priority:**
boat owners' **satisfaction.**

Products change to suit the practices and needs of boat owners. NV works tirelessly to provide satisfaction to all its customers.

Services for the end-user

- A multilingual website (4 languages) with a full technical database of documentation.
- Multi-channel customer service (website, social media, shows) to answer customers' questions and guide them to you.
- A NV sailors Community to keep in touch, and understand customers' experience and expectations.
