EcoWater Systems Introduces the Smartest Water Treatment Systems to Improve Comfort at Home.

Paris, FRANCE (January, 9 2017) - EcoWater Systems®, a Marmon Water/Berkshire Hathaway company, is going further to improve water and comfort at home with the introduction of eVOLUTION softeners – a range of Wi-Fi softeners with a totally new design and smart features.

In terms of design, EcoWater specifically developed dark appliances to reflect style and elegance. The display has been upgraded with higher contrast and extended information such as remaining softening capacity and salt, water usage, functioning of the softener, regeneration cycle, etc...

“Thanks to the new high quality materials and design, we want our customers to be proud to have an EcoWater at home!” said EcoWater Systems Marketing team.

Designed to fit into small spaces and meet the required capacity and flow rate, the eVOLUTION models are equipped with upgraded and exclusive valves to limit pressure drop and improve flow rates.

Sustainability with convenience

The latest generation of the EcoWater softeners integrate the most efficient water and salt algorithm. This unique algorithm allows the softeners to control the salt and water consumption according to the exact amount of soft water needed by the homeowners. It reduces the water and salt usage by up to 50 percent.

Our Wi-Fi technology has been enhanced with a new infrared salt sensor that alerts homeowners when the salt is low and needs refilling. This unique sensor will also automatically set the level of salt after a refill for optimal convenience.

EcoWater softeners make it easy to run a sustainable household without having to compromise on comfort and convenience.

About EcoWater Systems®

EcoWater Systems® is part of [Marmon Water](#), a [Berkshire Hathaway](#) company. Marmon Water is a global supplier of water treatment equipment for residential, commercial and industrial markets. Since 1925, EcoWater Systems has been dedicated to offering quality, innovative, eco-friendly water systems for residential and commercial applications. EcoWater is one of the largest manufacturers of home water treatment systems, which are sold under the EcoWater name through an extensive international dealer network.
