TAKEOVER OFFICINA NAVALE NANNI S.r.l.

Dear customer,
we are proud to inform you about MZ Electronic takeover of Officina Navale Nanni S.r.l. (O.N.N.).

O.N.N. was born in 1950 in Viareggio; it is specialized in creating vertical and horizontal windlasses, chain stoppers, capstans and deck equipments for boats up to 80-90 metres (diameter of the chain 32 mm with stud-link). All the products support electric, hydraulic and pneumatic supplies and can be certified with the most important naval registers (RINA, BV, LR, RMRS, ABS, etc.).

The factory has a big experience in carrying out custom products, in order to meet any need encountered during planning stage; that's why technical support supplied by our technical department through 2D/3D drawings and its support in choosing and positioning deck equipment is very important.

Some of the most important clients of O.N.N. are: Codecasa, Azimut Benetti (Viareggio e Livorno), CBI Navi, Viareggio SuperYacht, Rossi Navi and Perini Navi.

Thanks to this takeover, O.N.N. will enter together with ORVEA, the ITALWINCH windlass brand, widening our range, thanks to the new products, assuring our technical support and our presence abroad. O.N.N. production point in Viareggio will remain operating, increasing our presence and assistance in the area.
