Company Profile

Fitlock® system is the example how an idea become a construction standard for all kind of industry.

All began with the CEO Enrico Ciacchini, a boat builder and inventor and CEO of Daureka srl.

Mr. Ciacchini, was working on the interior fit outs of super yachts and he realised that there was a requirement in the industry for a new panel mounting system.

At the time, removable panels that were mounted in the interiors of yachts faced a number of problems, such as the inability to be precisely or securely positioned, panels sagging or falling down and the time required to install them.

Enrico saw this as an opportunity to develop a solution, so it uses all the new-born technologies (3d printing, fast prototyping) and the experience gained by the hundreds and hundreds of project successful completed whit Yachtline1618, to design the Fitlock System.

FITLOCK ensures a stable and precise mounting and the possibility of repeat the positioning operation countless times. FITLOCK allow the operator to adjust the position of the parties by allowing them to shift of 4 mm in EVERY direction without affecting the performance and reliability of the fastening.

With hundreds of boatyards and projects in over 30 countries using the Fitlock System, its exceptional performance in the marine sector has since the beginning attracted companies in the architectural, civil transportation and aviation industries.

Twelve years on, Fitlock run by directors Enrico Ciacchini, whit the a Brand New facilities in the area near Pisa, Tuscany ITALY. Enrico extensive experience, genius and a constantly "obsession" for perfection combined whit the extraordinary possibility of research and development provided by the partnership whit worldwide leader interior contractor company Yachtline 1618, ensures the cutting edge of what is needed to the market.

FITLOCK is a trademark legally registered by the company Daureka s.r.l.

Fitlock is not just a fastening system, but also a technology and design company with a focus on research and innovation.
