

PROUDLY AUSTRALIAN OWNED

In January 2012 Scott Smiles, Rick Matthews and their two 11 year old sons were stranded at sea after their boat sank suddenly and without warning 6 miles off the coast of Sydney. With only seconds to grab essential safety equipment they quickly found themselves clinging to a cooler in the open sea and in a catastrophic situation. Luckily they survived, and this near death experience inspired them to create a device that redefines how safety equipment is stored and used on boats.

Life Cell™ is now fully endorsed by the very people that saved their lives, the Westpac Lifesaver Rescue Helicopter. The Life Cell™ will reduce the number of people that tragically lose their life in boating incidents.

VISION

To reduce the number of people that tragically lose their life in boating incidents.

MISSION

To create a new standard in boating safety that redefines how safety equipment is stored and used on boats to improve survival rates, reduce the cost of maritime rescue operations & routine inspections and get maritime safety back on the public agenda.
