Mooring a boat has never been easier!

Tired of dirty hands, cuts and mud on the deck while mooring the boat?

Boatasy GHOOK has been developed to help you mooring the boat faster, safer and much easier than ever before!

While holding the rope instead of a crew, its wide rotating wheel effectively and fastly moves even the most overgrown mooring lines – without even touching the hands or the deck.

3 easy steps on how to use Boatasy GHOOK

1. Open the safety closer and place the mooring line on the wheel.
The safety closer will close automatically.
2. Walk along the boat in order to bring the rope to the chosen bitt.
3. Take the rope out of the Boatasy GHOOK and adjust it to the bitt.
