

# SWEDISH LORRY PARTS

# We make your vehicle last longer

Swedish Lorry Parts is a leading brand on independent quality spare parts for the Swedish heavy vehicle brands Volvo and Scania. In 91 countries we offer reliable supply and cutting edge support, 24 hours a day.

# Business idea

---

We develop and market a professional range of spare parts for Volvo and Scania trucks, buses, construction equipment and engines. We aim to always offer our customers the best possible service and to supply products that meet their high expectations.

Spare parts from SLP are to be the natural alternative to OES parts for demanding heavy vehicle owners all over the world over.

# Our history

Lars Hedlund  
Founder

Lars Hedlund, owner and founder of SLP, started 1972 developing drawings and having parts made by Swedish subcontractors. He was first to create a replacement program of spare parts suitable for:

- Volvo passenger cars 1974
- Volvo Penta light engines and drives 1987
- Volvo trucks and buses 1993

- Volvo construction equipment 2004

The passenger car side and marine department were sold 1991.

The range of products increases with approx. 1.500 items per year and is now nearly 13.000.

# In-house development

Our skilled and experienced technicians develop their own design drawings and constructs their own tools for the main part of our products. Our products are designed and manufactured mainly in Sweden, an advantage as they are intended for Swedish heavy vehicles.

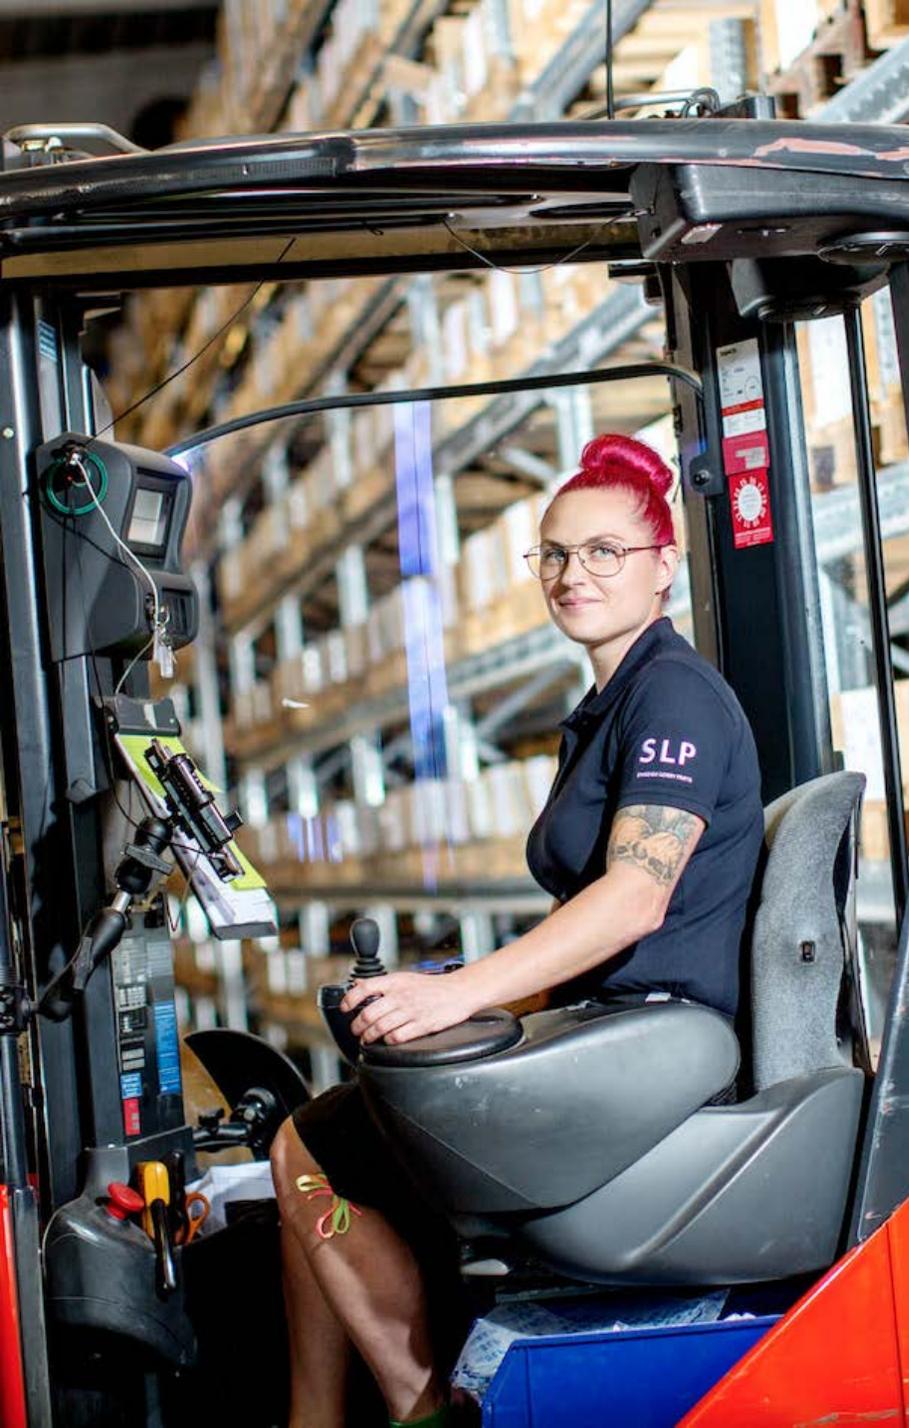

# Quality without compromises

---

Commercial vehicles are used daily under really tough conditions, thus durability and reliability of each part are therefore of highest importance. We compete against original parts, but we aim to be better and more affordable.

Certified for ISO 9001

# Swedish quality parts

---

Independent spare parts for Swedish brands  
Volvo and Scania.
