

ANTI-SEAGULLS  
SYSTEMS 2018

**StopGull** designs and manufactures products to deter all types of birds from landing on yachts and marina facilities.

There is nothing worse than arriving at your boat to find it covered in bird droppings, which if left unattended can have serious effects on decks, canvas and aluminium masts.

StopGull manufactures many different devices to fit all over your boat. Some rotate in the wind, others are static, but all are designed to frighten birds away without harming them—and to keep them away. The devices are silent, use no electrical power, and are manufactured for the marine environment. All steel parts are AISI 316 stainless steel.

StopGull products are particularly effective when boats are unattended in marinas or at anchor.

## StopGull Air

Ref: 3030001 (open diameter 185cm - 6,06ft)

StopGull Air employs a pair of rotating arms approximately six feet in diameter, which can be mounted anywhere on a boat using one of eight different mounting adaptors. The device rotates in even a light breeze and deters birds from landing in the vicinity. A larger version, Stopgull Air XL is already available, with a diameter of nearly eight feet.

StopGull Air is simple to install on booms, Biminis and rails and requires no tools. The StopGull Air simply clips on to an adaptor and when not needed it can be removed from its base adaptor and folded for storage.

## StopGull Air XL

**New size !!**

Ref: 3030019 (open diameter 235cm 7,70ft)

The new StopGull Air XL is aimed to cover wider areas of large yachts and sailboats.

(StopGull Air is a patented product in the USA)

## Handrail support

Ref: 1010001

This adapter fits on any handrail of 22mm to 28mm (0,86inch. to 1,14inch.) diameter. The support can be fitted in both horizontal or vertical plans. It is made from anodized aluminum and stainless steel.

## Open bimini support

Ref: 1010002

Designed to be installed on a Bimini arch when it's open. The adaptor fits Bimini frames from 22mm to 28mm (0,86inch. to 1,14inch.) diameter. The adaptor clamps on the frame and can therefore be fitted at any frame angle to ensure the StopGull Air is horizontal.

## Suction cup support

Ref: 1010010

This mount has a suction cup which can be attached to any smooth solid surface, such as a hatch, or an outboard motor cover, hardtop, etc

## Air Sandbag Support

Ref: 1010013

This adaptor weighs nearly 4kg. (9lbs) and may be placed in any flat surface, like the deck solarium.

## Boom & folded Bimini support

Ref: 1010012

This is a very versatile adaptor which can be strapped to a sailboat boom, without sails or sail covers, or to a Bimini when the Bimini is folded. It has three straps of one meter long, with safety buckles to be tensed.

## Inflatable boats support

Ref: 1010003

This mount kit will fit all types of inflatable or solid dinghies. It is made from nautical acrylic fabric and has four guy ropes and hooks to fit the external bumper profile of the boat. It has a telescopic mast on which the StopGull Air is mounted.

## StopGull S27

Ref: 2020001

The StopGull S27 is a single rotating device which birds cannot perch on because it will rotate and not allow them to land. It has a self-adhesive surface and may be placed on any flat area, like navigation lights and also marina lights.

## Air Support Railing

**New product !!**

Ref: 1010015

To install the StopGull Air support on handrails from 38mm to 110mm (1,49inch to 4,33inch).

## StopGull Keeper

Ref: 3030002

The StopGull Keeper is for installation on radomes, TV dishes and even lamp posts in marinas. The protruding rods prevent birds from landing. The base must be glued using an adhesive which is suitable for the material to which it is to be attached.

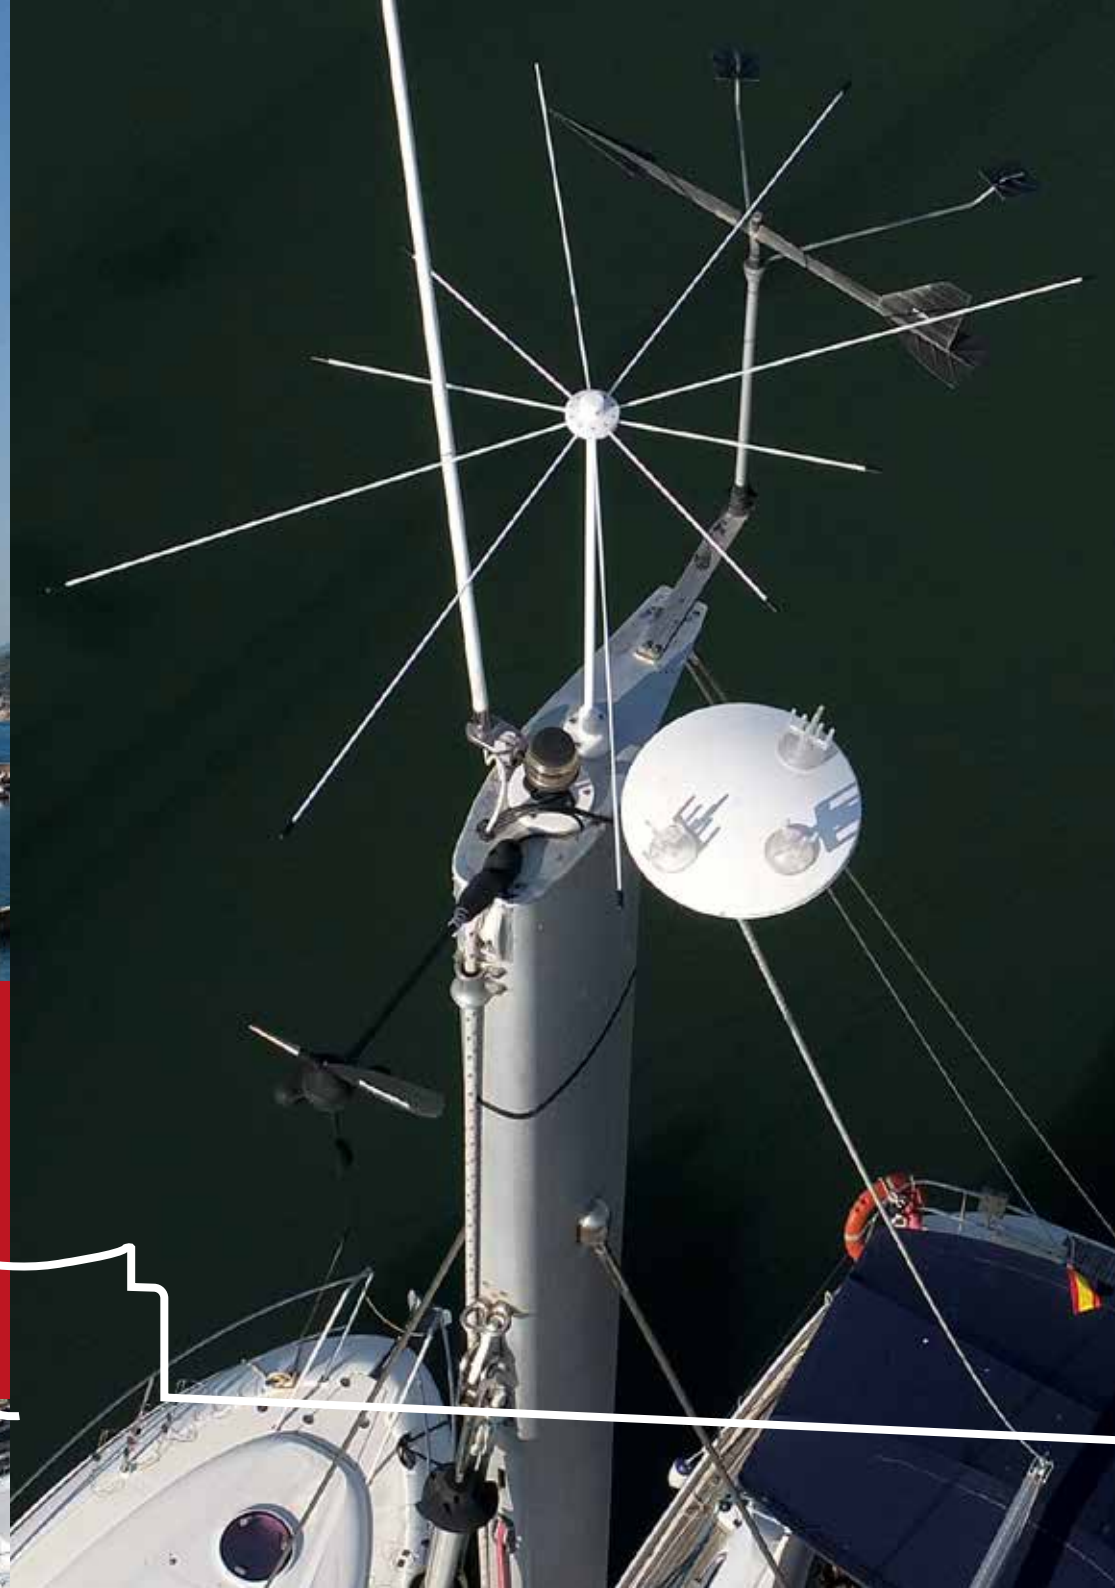

## StopGull Topmast

Ref: 3030020

**New product !!**

StopGull Topmast is designed to prevent birds landing on your mast head, where a large bird can easily break a wind direction vane or the windspeed cups. The protruding rods may be set in any direction and height, to avoid the elements of the top of mast. It comes with a lateral and flat base.

## StopGull Bimini Sailboat

**New product !!**

Ref: 1010016

The StopGull Bimini Sailboat, is aimed to the biminis of the sailboats when the ropes and another elements, don't allow to install the StopGull Air device.

This is a 95cm (37inch) long strip of nautical acrylic canvas incorporating StopGull S27 rotating devices at 7cm (2,75inch) intervals. It can be strapped to an open bimini using the attached tapes and safety fasteners. It will prevent birds from landing on the Bimini

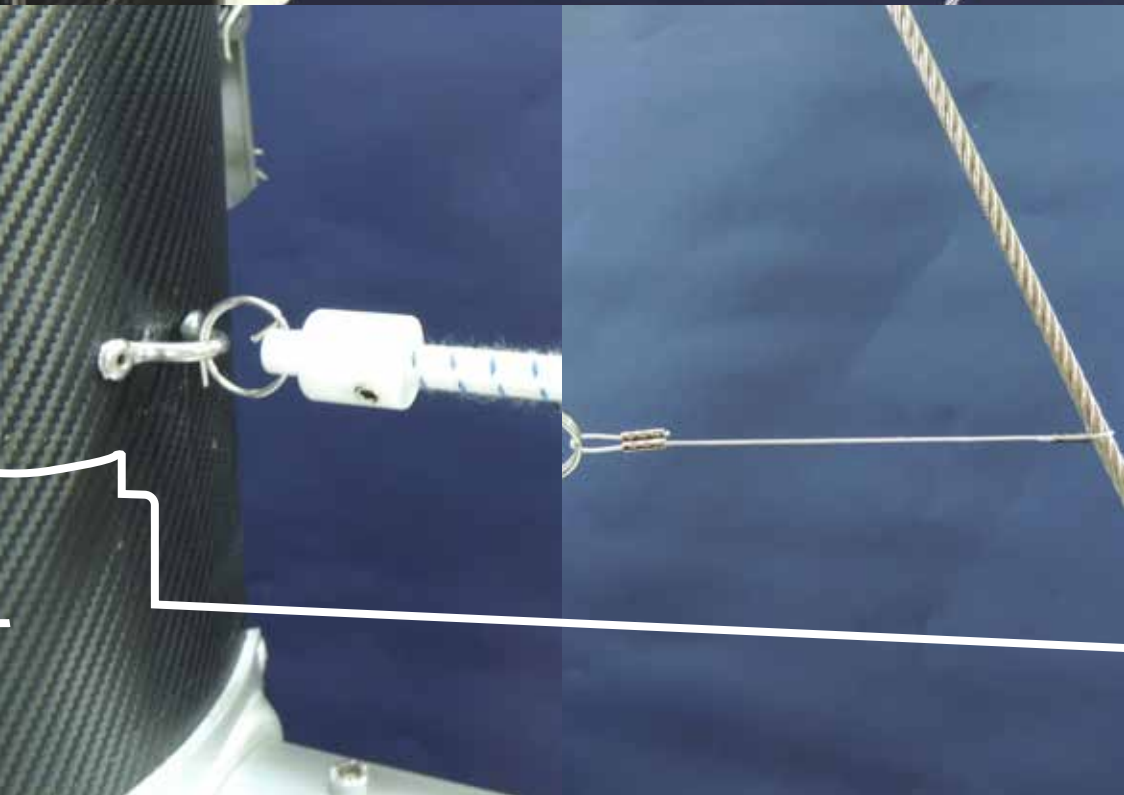

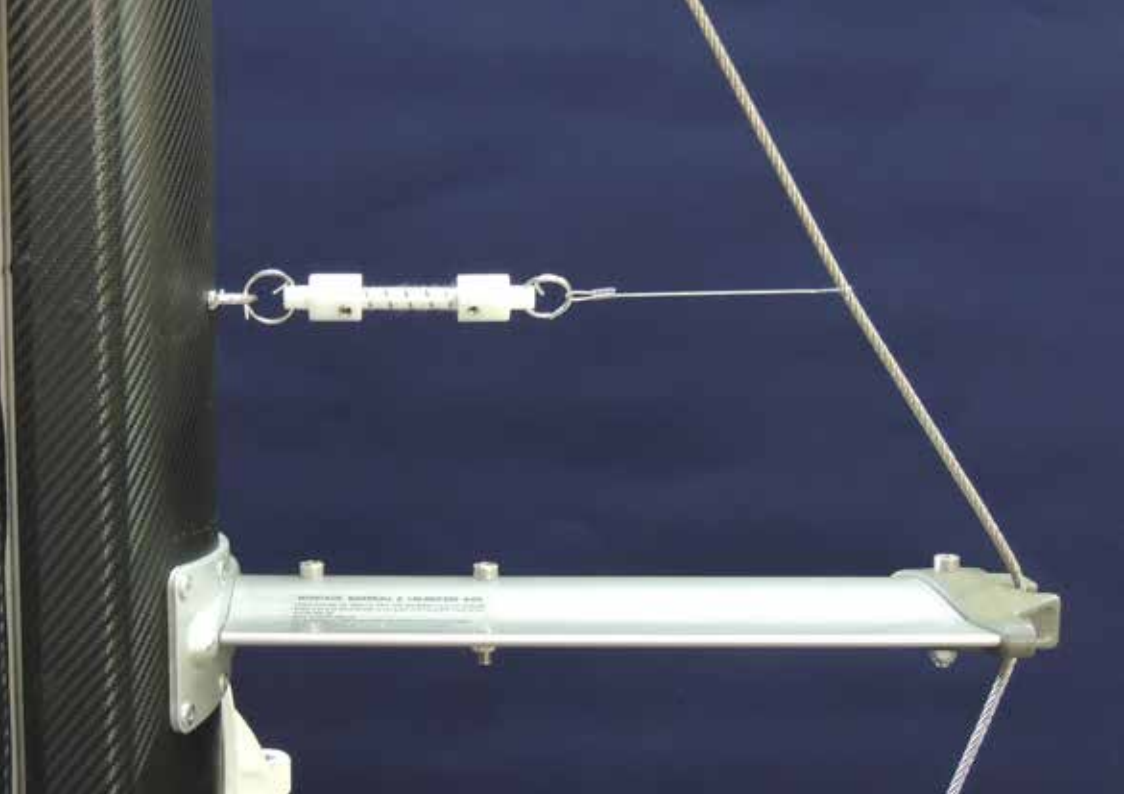

## StopGull Spreaders

Ref:3030021

**New product !!**

Sailboat spreader, (crosstrees), are a favorite place for birds to land. It consists of a wire stretched between the mast and the outer stay. It is positioned just above the spreaders and effectively prevents birds from landing anywhere along the spar. The kit contains all necessary items to mount the wire, including pop-rivets and swivels. A short length of bungee cord keeps the wire taught.

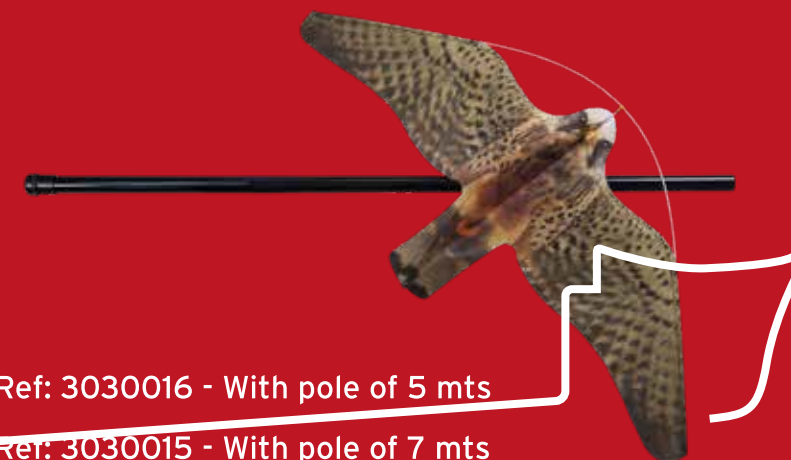

## StopGull Falcon for MegaYachts and Marinas Facilities.

Ref:3030015

This unique bird deterrent is in the form of a life-like Peregrine Falcon. It attaches by a nylon line on the end of a 16 or 22 foot long adjustable telescopic pole. The Falcon flies even in very light wind and its 63cm (25inch) wingspan actually flaps like a real bird. It even has transparent eyes which shine in sunlight, causing other birds to keep well clear. The device may be positioned anywhere where it can fly clear of rigging or sails.

It's made of aeronautical fabric of high strength. The StopGull Falcon device is presented with a telescopic pole of 5 or 7mts. (16,40ft or 22,96ft ) and an invisible nylon rope of high resistance.

Ref: 3030016 - With pole of 5 mts

Ref: 3030015 - With pole of 7 mts

Ref: 3030017 - Spare part

## Boat Vent 3 StopGull Air mount

Ref:9090002

## Boat Vent 3

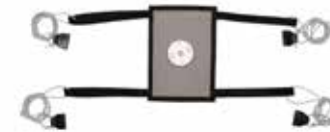

Ref:9090001

The Stopgull Air Boat Vent 3 is a perfect way to mount your Stopgull Air to the top of your boat cover. With this support, two benefits are obtained: To avoid gulls and coastal birds land on the mooring canvas and at the same time allows the ventilation inside the boat, preventing moisture, mildew and bad smell, and the condensation of cockpit indicators.

The Boat Vent 3 venting device, adds value to covered boats by mooring canvas, due that it prevents the moisture and mold. The Boat Vent 3 has an overhanging top to allow in less moisture. It has 30 teeth for a better grip and an argonomic reversible nut for easy installation. StopGull sells the Boat Vent 3 and Boat Vent 3 for StopGull Air within an individual blister.

(The Boat Vent 3™ devices are products of Vico Plastics Inc.)

## Product List:

Inflatable boats support - Ref: 1010003

Handrail Support - Ref: 1010001

Open bimini support - Ref: 1010002

Suction cup support - Ref: 1010010

Air Sandbag support - Ref: 1010013

Railing Support - Ref: 1010015

StopGull Keeper - Ref: 3030002

StopGull Topmast - Ref: 3030020

StopGull S27 - Ref: 2020001

StopGull Bimini Sailboat - Ref: 1010016

StopGull Spreader - Ref: 3030021

Boat vent support Pole  
Ref.: 9090003 - from 85cm to 150cm  
Ref.: 9090004 - from 95cm to 180cm

StopGull Falcon  
With pole of 5 mts - Ref: 3030016  
With pole of 7 mts - Ref: 3030015

StopGull Falcon  
Spare Part - Ref: 3030017

Boat Vent 3 StopGull Air mount  
Ref: 9090002

Boat Vent 3 - Ref: 9090001

\* All supports fit to the StopGull Air and StopGull Air XL devices.
