

COLTECH® TRANSELAST®

The advanced long-term protection Wood Coating

COLTECH® TRANSELAST®

The advanced long-term protection Wood Coating

COLTECH® TRANSELAST is a high-built, fully aliphatic Polyurethane transparent coating providing absolute UV and light resistance, extreme durability due to high coating thickness, high elasticity preventing cracks and peel-offs, water vapor permeability in order to allow moisture to dissipate and the wood to behave naturally and extremely high resistance to alcohol, gasoline and cleaning agents.

As a result, your boat deck will look new again and will be protected from the combined weather influences and heavy use. Compared with conventional Marine wood varnishes, **COLTECH® TRANSELAST** will function and protect your wooden surface for many years to come without the need of grinding and reapplication.

Available in high gloss
and satin matt finish

COLTECH® TRANSELAST®

The advanced long-term protection Wood Coating

Wooden boats are permanently exposed to a combination of moisture and sunlight impact, saltwater, rain and mechanical wear conditions. The result is dried and discolored decks and other wood surfaces.

The solution is offered by **COLTECH® TRANSELAST** advanced long-term protection Wood Coating System.

USES

- « Wooden Decks and Stairways
- « Wooden Railings
- « Wooden Stools
- « Wooden Masts
- « Wooden Crates
- « Wooden Rope Ends

ADVANTAGES

- « Easy application, ready-to-use
- « UV- and weather resistant
- « When applied, creates an extremely durable, transparent, high-thickness membrane
- « Elastic and therefore does not crack and peel-off as other conventional low-thickness wood varnishes
- « Heavy-duty, abrasion and pedestrian traffic resistant
- « Salt water and chemically resistant
- « Breathable - lets the wood behave naturally
- « Long life span
