WATERLINE DESIGN

Waterline Design

2019 will be an exciting year. We have some new products to present.

- *Throw over net* – upgraded with new affordable nets with lead band in addition to our ecological nets + new size for small hatches.

- *Mr Mooring Flexible* – new fastener in stainless steel for Mr Mooring Flexible

- *Moisture and heat insulation* – a silver insulation to be mounted between the hatch / portlight to prevent moisture. In warm countries, it will also reflect heat.

- *Updated pictures* – easy to download new / updated images, movies, fact sheet for your catalog and online shop. Google drive / Dropbox / usb-drive.

Wishing you all a happy 2019 boating year!
The crew of Waterline Design

# BLINDS WITH VENTILATION

For a dark, ventilated and mosquito free indoor environment

The combination of a two layer blackout material and a one layer dense mosquito net, results in a breathable and dark boat for the best sleep. The blinds mount with a suction cup or a magnet from the inside. The 1300 series covers hatches, portlights and companionways. Since the blinds are larger than the hatch it will fit smaller hatches / portlights as well and also fits all brands. All mosquito nets come with suction cup, magnet and a storage bag.

- Pop up = 5 sec. mounting
- Fits all brands of hatches
- No fixed installation
- 100% Blackout
- Mounts from the inside
- Keeps out mosquitoes, gnats, sand flies, No-See-Ums, wasps etc.

MOSQUITO NET

A universal sized mosquito net that fits all brands of hatches and portlights. Mounts from the inside with a suction cup or magnet. The mosquito net should be larger than the "cut out" size to cover the hatch opening. It will also fit different shapes: rectangular, square and round hatches and portlights. A few products cover all sizes of standard hatches / portlights. The mosquito net should be larger than the "cut out" size to cover the hatch opening. All mosquito net come with suction cup, magnet and a storage bag.

- Pop up = 5 sec. mounting
- Fast mounting with suction cup or magnet
- Fits all brands of hatches
- Mounts from the inside
- Works on flushed hatches
- Dence net – keeps out mosquitoes, sand flies, No-See-Ums, gnats, wasps etc.

SPREADER BOOT IN LEATHER

The spreader boot is made of leather with a rubber cord edge providing great protection whatever the design of the spreader. The inner side is lined with neoprene for a perfect fit. The protection is complete with a long Velcro strap to fit even wide spreaders. Just cut the Velcro strap to a suitable length and mount the boot with the Velcro pointing backwards. Sold in pairs. Four sizes available.

- Easy to install with Velcro
- Fits all brands of rigs
- Leather = natural material
- Neoprene on the inside
- Protects both fore/main sail
- UV protected with leather

1. Measure width   **2.** Continuous or Linked rig

MOISTURE / HEAT INSULATION

A lot of boats have problems with inside moisture. Moisture comes from the difference between the in- and outside temperature of the boat. Hulles are today insulated as well as the glass in the hatch. The aluminium / stainless steel in the hatch will create a bridge for the temperature difference. A layer of insulation will make an effective solution to insulate the hatch. The moisture / heat insulation is mounted as an extra layer between the mosquito net or blind and the hatch. The insulation must be used in combination with a Waterline Design mosquito net or blind.

The silver color is also very effective for heat reflection. A hatch with smoke colored glass can get very hot during a sunny day.

Mr MOORING - MOORING LINE HOLDER

Keep your fixed mooring lines in place when you leave the harbour. Place "Mr Mooring" on your mooring fingers, bollard or the dock. Hang up your mooring lines on Mr Mooring when going out and pick them up when back in the harbour. Mr Mooring simplifies the docking. No risk of getting the mooring line in the propeller and no algae on the rope. Room for two lines = easy to share with your neighbors boat. New foot with spring steel to make it flexible yet stiff enough to hold the line during strong wind (#1784).

Easy installation with two cable ties (included). For dock poles/bollards or dock, use the optional screws and brackets (#1782). Mr Mooring is made of impact resistant and UV-protected HD polyethylene and polycarbonate. 100% recyclable. Made in Sweden.

- Works on dock pole, docks and mooring fingers
- Resistant and UV-protected
- No dropped cell phone while leaning over the railing
- Fast mounting with cable tie

SPIROLL – ROPE PROTECTION

Extends the life of ropes, tamps and removes sound from cleats. Made out of UV-resistant sturdy polyurethane to endure the harshest marine environments. Easy mounted/wrapped around the rope, no additional attachment necessary. A special technique enables the cover to automatically wrap around ropes and lines, which provides a perfect fit.

Spiroll also reduces "squeaking" from the mooring cleat and protects the boat's gelcoat against wear.

- Easy to install and remove
- Protect your lines
- Reduces noise in mooring cleat
- Salt water proof
- Extends the life of your ropes
- UV-resistant

MAGNET MOUNTING

The new way to fasten a mosquito net or a blind on a hatch / portlight. A small metal plate is mounted on the hatch with 3M doublesided tape. The magnet can easily be mounted to the metal plate. No chance for the magnet to fall down. We have made the doublesided tape a little smaller then the metal plate so it can easily be removed without damage the hatch. Just put in a screw drive under the plate and with a easy twist the foam tape will break. Use your thumb and roll of the tape recedue and finnish with some cleaning liquide that doesn't harm the hatch.
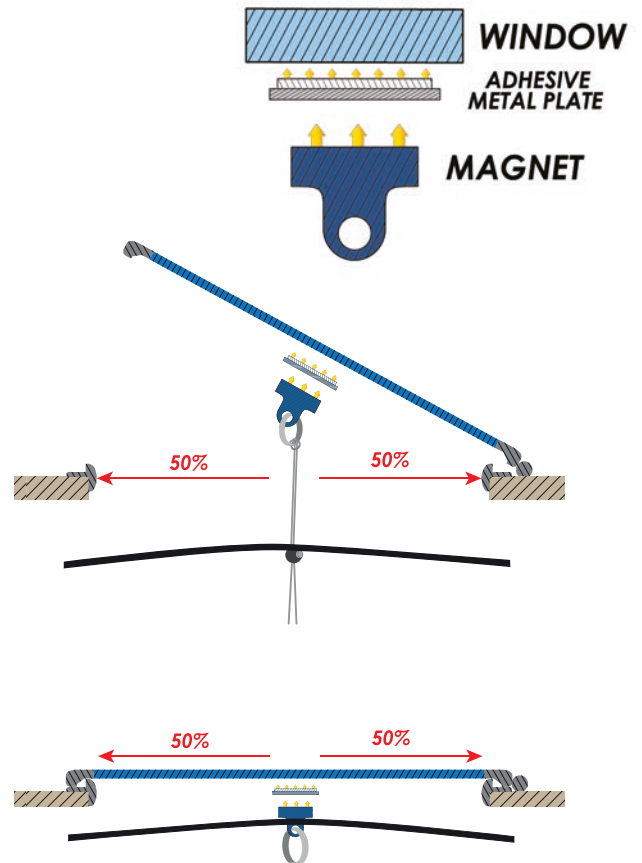

OEM

We can brand our products OEM (Original Equipment Manufacturer) with your own package, logo on products, carry bag etc., even in small series. Contact us for more info.

Rutgerson Marine, branded package.
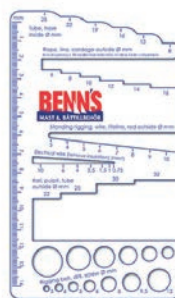

Branded product with logotype

Oceanair LTD. Mosquito net for round portlight in small serie.

FAQ - FREQUENTLY ASKED QUESTIONS
# MOSQUITO NET AND BLINDS

Does the net/blinds fit round hatches?

Yes it will fit all shapes, round, square and rectangular. For example, there will be larger overlap in the corner on round hatches.
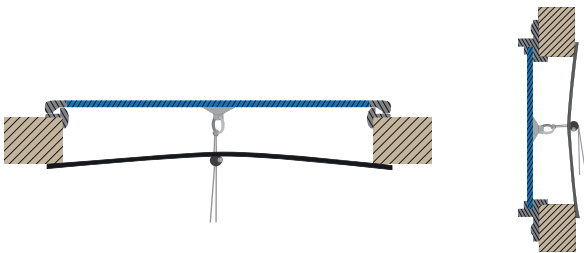

Does the net/blinds fit oval portlights?

Yes, it will fit rounded, oval and rectangular shaped portlights.

Does the net/blind fit deep hatches/portlights?

Yes, with nets it's no problem and with blinds you need to prolong the suction cup in the same way as the mosquito net.

Does it fit on a fiberglass hatches?

Yes, but you need a small plastic plate that you tape on the hatch for the suction cup to hold. It's sold as an accessorie #1542.
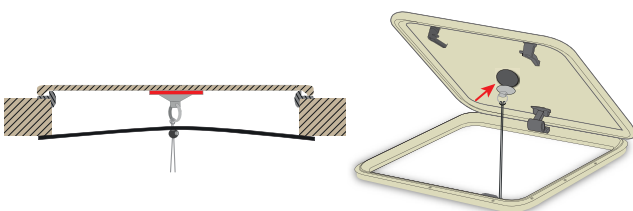

Does the suction cup sit all night?

Yes, but the hatch and suction cup must be clean. Old hatches often have some grease/dirt that needs to be cleaned with soap and water. If there is problem, clean both hatch and the suction cup. If the hatch and suction cup are clean it can sit for years.

How do you mount a mosquito net on portlight that opens inwards?

The net will be on the outside. 95% of all portlights opens inwards.
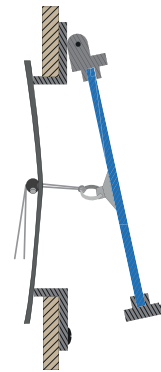

RETAIL PACKAGE

Clamshell made of PET plastic (ecological). The package is easy to open without destroying the package. Front in English and backside in local language.

WATERLINE DESIGN

What is a regular hatch and large hatch?
Often the hatches are ~500 x 500 mm on boats. It's large enough to exit (often an emergency exit). If the hatch is larger you use a net / blind for large hatches. It's to make it easier to choose the right product. You can also measure the hatch to choose the appropriate size of net / blind.

How do I measure a hatch/portlight?
You measure the "cut out" size, the size of the hole the net / blind needs to cover. The net / blind must be larger than the "cut out" size.
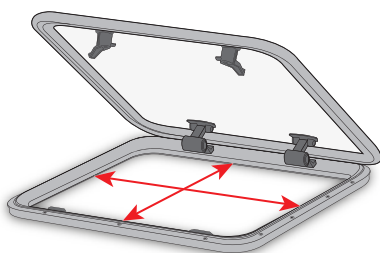

Does the mosquito net only fit one brand?
All the net/blinds are universal and fit all major brands and standard hatches / portlights. You don't need to know the brand or which year the hatch is made etc. It will fit.

Doesn't the mosquito net fall into the water if the suctions cup doesn't work?
It's not a problem if the suction cup and the portlight is clean but to make sure we have included a security line that you have from the suction cup to one of the handles of the portlight.

If there is a ventilation in the middle of the hatch, how will the net / blind suction cup hold?
You must use a blind with 2 suction cups(#1315 or #1320). For mosquito nets this is not a problem since the suction cup can sit on the side of the ventilationi.
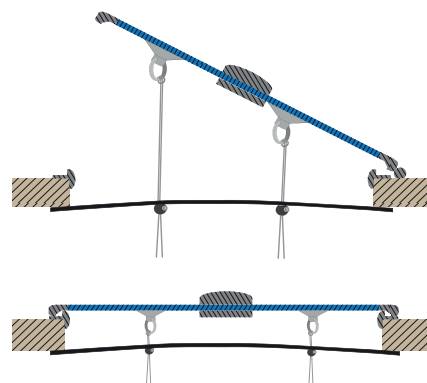

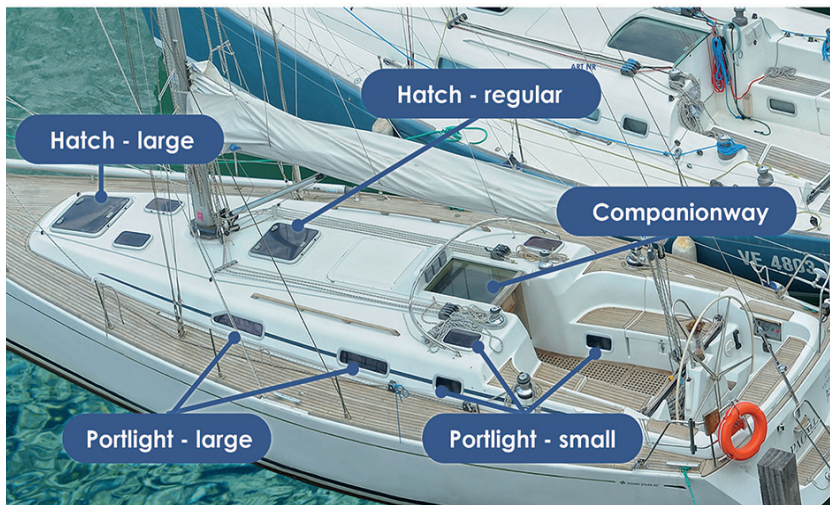

Does it fit both sail and motorboat?
Yes the hatches are the same so it's not an issue.

DIGITAL MATERIAL

NEW START IMAGE

Due to "new recommendations" for online shopping, we made new start images.
- Enlarged products to cover a wider area
- Other is transparent
- White background
- Image in high resolution JPG, 300 DPI, 3000x3000 px, CMYK
- Image webready JPG, 72 DPI, 1000 x 1000 px, RGB

NEW INFOGRAPHIC IMAGE

To visualize some of the benefits we made infographics images in order to:
- Highlight benefits
- Image in high resolution JPG, 300 DPI, 3000x3000 px, CMYK
- Image webready JPG, 72 DPI, 1000 x 1000 px, RGB
- Available as illustrator-file for easy translation (on request)
