

Press Release  
November 6, 2018

## **Dare the electric propulsion !**

**Discover NO FUEL's energy transition solutions at METSTRADE's NAUTICAL  
HIGH TECH & GREEN booth in Amsterdam  
Meet us to the MPY at booth # 05-106, November 13th, 14th and 15th!**

NoFuel offers its expertise in tailored solutions of electrical and hybrid propulsion for existing and new boats towards the yards. It integrates the skills of naval architecture, marine engineering and electrical engineering, installation management at yard. In parallel, its expertise is useful for ports and marinas to understand the needs of boats to gear up their infrastructures.

Specialised in marine electric propulsion  
NoFuel is a company acting as an engineering office and a consulting partner.

Switch to electric propulsion with NoFuel and take part in the new era of boating. NoFuel can design, engineer, build and convert any type of vessel with electric or hybrid propulsion.

Imagined and conceived in Monaco.
