

METS - SYP 2019
Amsterdam, 19-20-21 November 2019
HALL 10 Booth 320

PRESS RELEASE

Cantalupi Light Engineering attends the 32° edition of METS, one of the most important international trade show reserved for operators in the nautical industry.

This year, together with the evolution of company's name from "Cantalupi lighting" to "Cantalupi light engineering" to emphasize the range of services offered in addition to lighting elements, Cantalupi presents the story of a stylistic and cultural transformation in its "CANTALUPI LIGHT ENGINEERING EVOLUTION SPACE".

The Company introduces the following product lines evolution with new aesthetic and functional design possibilities:

- BACKLIGHT PANELS - multi surface decorative lighting panels for interiors and exteriors <https://www.cantalupilighting.it/collections/backlights/>
- STRAIGHT TRACK - the Innovative modular track lighting system <https://www.cantalupilighting.it/catalogues/>
- DOWNLIGHTS for interiors and exteriors

The quality of Cantalupi Light Engineering creations and the continuous collaboration with architects and designers makes the company a benchmark in the high-end lighting market.

Cantalupi develop in its factory every step of the pipeline: from the concept to the production. That's how we make sure to deliver products we are proud of.
