

# MOSQUITO NET TO FOREDECK HATCH

Mosquito net mounted from the inside

Open hatch give good ventilation

Hatch with mosquito  
net in profile

Keep mosquitoes away from the forward cabin. Install it without having to go outside. Open the hatch and attach the suction cup on the window from inside and fasten the mosquito net in place by tightening the lock for the suction cup cord. The mosquito net is dense enough to keep small insects and gnats outside.

The mosquito net fits most foredeck hatches on the market up to 520 x 520 mm (20 x 20 inches) inside dimensions. On fiberglass hatches you need to mount a little plastic plate for the suction cup to be attached on (optional). When not used the mosquito net is folded and stored in the included storage bag, 1/3 of the size.

## PRODUCT INFORMATION

<b>Material:</b>	Polyester net with chromed steel frame
<b>Colour:</b>	Black
<b>Weight:</b>	20 g
<b>Size:</b>	600 x 600 mm
<b>Shipping weight:</b>	25 g
<b>Package size:</b>	Ø 150 mm, height 10 mm
<b>Art nr:</b>	1220
