

A synthetic teak deck is the perfect alternative to teak wood

The characteristic lines that are so typical for teak wood are realized exactly the same way with Topdek. The stylish lines of your yacht are beautifully accentuated and the layout of the deck is given a rich look and feel.

A new deck starts with good advice, especially in case of a complicated pattern where everything has to match perfectly. Ask our team of specialists about the options or a quotation.

30%

Cooler underfoot

Faster cooling than conventional composite decking.

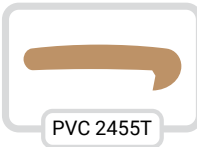

32%

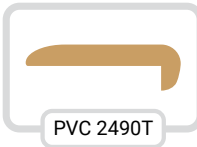

Lighter in weight than 1G

Less weight on your boat for greater efficiency.
