

Easterwoods Trading

Easterwoods Trading BV imports high quality teak from Latin America. We are a young company with sound knowledge, many years of experience and an extensive network.

Quality

We purchase our timber directly from the local owners. The wood is sawn at an established sawmill under supervision of our employees.

We always import all the wood ourselves.

Easterwoods teak is traceable and accompanied by the required paperwork.

Continuity

We have developed a steady supply of rough sawn teak and lumber sorted into different quality categories.

Easterwoods can provide teak for whatever application you require.

Now and in the future.

Specials

Whether you have a special project or specific requirements. Easterwoods has a wide range of large diameter teak logs in stock. These can be cut to meet your desires.

The logs have been purchased from old plantations and meet the high quality requirements that we are accustomed to by teak. Do you prefer uncut logs? We aim to have these in stock and if necessary we will import them to Europe for you.

Curious?

Are you interested in high quality teak? You are most welcome to visit us and check our stock for yourself.

Do you have any questions or do you need to know more? Would you like to make an appointment? Please contact Gijsbert van der Woude, Easterwoods Trading BV.

Check our website for more information on what we have in stock.
