

CRAMM YACHTING SYSTEMS

Cramm is a Dutch based company developing custom made hydraulic systems for superyachts. With over 65 years existence Cramm offers a lot of knowledge and experience to the top of the superyacht industry. Many things have changed in those years but our commitment to deliver excellent products has not. Today we are a multidisciplinary supplier operating in the international superyacht industry. The last decade we went through a significant increase in the scale of our projects. Not only new built, but also in refit and repair projects. Our latest development in our processes is the service agreement for carrying out maintenance and repair work.

Interested in finding out more about our refit & repair and maintenance programme? Contact our service and refit team at +31 (0) 88 457 0450 or refit@cramm.nl.

Your reliable
partner for
excellent refits

EXCELLENT WARRANTY CONDITIONS

As a partner in projects, Cramm Yachting Systems can take care of the whole refit scope of hydraulic equipment for superyachts. This way we monitor every stage in the process and ensure the highest level of operational security. A warranty period of 12 months after delivery applies to all products. With our service agreement we can also offer an extended warranty of five years. The benefit of this service agreement is that it gives the yacht priority to a service on site if required.

Specialist in high-quality refits

SERVICE AGREEMENT

- Priority service on site
- Keeping the condition of the equipment to a high standard
- No unexpected down-time, only conveniently scheduled visits
- Malfunctions minimized, repairs limited
- Controlled and limited costs
- Yearly inspection, preventive maintenance included
- Reduction of operational risk
- A report of the activities each year

REFIT & REPAIR, MAINTENANCE

Repair of damage, wear, mechanical or hydraulic failure or implementing renewals; our engineers and project managers have a wealth of knowledge and experience in carrying out repairs and refits using the latest technologies and materials. We gained experience from working with numerous ship yards, crew members and architects on a wide range of brands. This has made us a specialist in high-quality refits for all types of yacht equipment. We offer a total solution for any refit & repair requirements of the hydraulic equipment on board a superyacht. Worldwide service and inspection is possible on request.

Refits are based on the turn key principle, disassemble, ship to our facility, overhaul completely repaint and Refit on the yacht with a thorough test on board of all the equipment which has been refitted. We register all the technical data of our products in a database so that our technicians are always able to perform the appropriate maintenance or repairs. Cramm Yachting Systems provides two types of maintenance: corrective and preventive such as annual survey's, load tests and inspections.

HIGH QUALITY STANDARD

Cramm equipment is built to a very high standard and proven to be very reliable. The installation has been carried out by experienced and highly trained technicians with maintenance in mind. A good access to serviceable components is normal to our team. Our mechanical and electrical engineers are OEM trained and well experienced in a wide range of equipment and systems. The job will be done within the predetermined time frame. Adding more work? We will do our utmost to speed up and finish on time.
