

NV-16 ANCHOR WINDLASS

NV 16 is a stainless steel AISI 316 vertical windlass. Available in electric and hydraulic versions, it is suggested for boats up to 42 meters. It can bring chains from 12mm to 16mm with stud link. The electromagnetic brake and dog clutches instead conical clutches are standard.

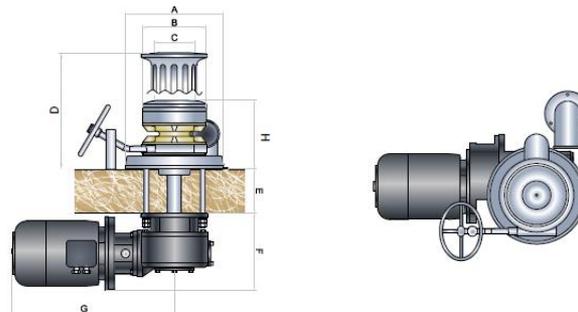

Main advantages:

- Heavy duty band brake, bigger than same competitors' range
- 155mm diameter of mooring drum
- Dog clutches instead conical clutches
- High efficiency gearbox for 1900 Kg of continuous pull
- Magnetic brake for 3phase 230V-400V AC motors

Motor Power	4000W	Hydraulic
