Watch your TV anywhere

Beyond the barriers of conventional TV

Specifically designed for maritime VSAT environments, Plexus TV is an end-to-end decoder place-shifting solution. It allows you to stream any content, over your Broadbeam nextGen link, using a bandwidth efficient IPTV stream to wherever you are located.

* First decoder service fee free of charge, set-top-box and setup fees are applicable. Decoder and subscriptions to be provided by client.

Leading worldwide
VSAT services

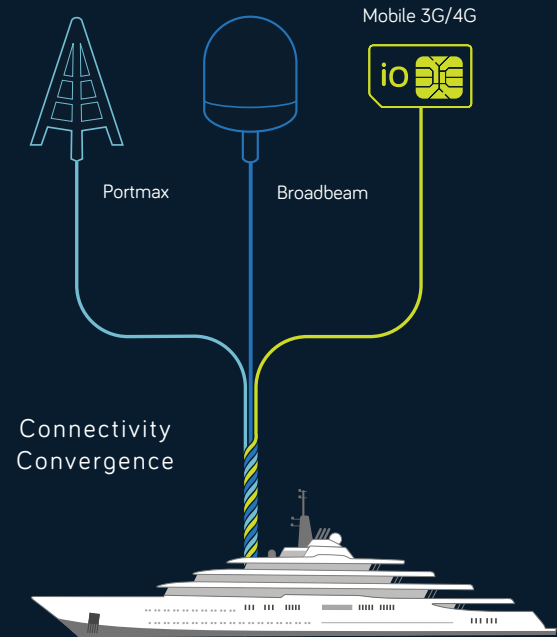

Beyond the barriers of conventional TV

-  Single contract associated to multiple SIM cards
-  Management portal
-  Integration with your existing systems

iO nextGen cellular data

- European coverage
- Buy as many bundles as you need
- Or pay as you go

Traffic Steering
iO application-based steering

You can now manage and route your traffic through various access networks depending on the application’s sensitivity to latency, such as video streaming or web browsing. Intelligently adapt and program your network infrastructure through our iO application in order to maximise the end-user experience through the best network technology available.

Bonding *iO traffic bonding*

Combine your different 4G connections to maximise your throughput with our hardware-agnostic iO bonding. You will receive a consolidated speed whilst paying no additional fees for the bonding service.

Loyalty & Rewards

Terms & Conditions

Our NextGen “Loyalty and Rewards” offer starts as of May 2016, and cannot be applied retroactively. To be eligible for either **Bronze**, **Silver** or **Gold** levels, clients are required to remain under contract for the entire 1, 2 or 3 year duration.

Loyalty and Rewards begin only after first year of service.

* Travel expenses for **Gold** “Annual on-site VSAT survey” will be charged at cost price. On-site visit is subject to prior planning and availability of field engineering team.
