

Oceanvolt SD 15

Electric propulsion for sailing yachts

High efficiency

- Brushless permanent magnet motor
- Saildrive with 1,93:1 reduction

Compact

- Lightweight: Drive and motor only 42kg
- Minimal space requirements
- Compatible with lithium batteries

User friendly

- Illustrative graphic display
- Charge level and remaining operating time indicators

Closed liquid cooling system

- Combined lubrication and cooling system
- Easy installation – no extra water inlets
- Low maintenance

Reliable

- Minimal amount of moving parts

Silent

- Custom spiral bevel gear
- Flexible mounting to hull

PRELIMINARY:
Information subject to
change without notice.

Technical data

Nominal power	15 kW
Nominal torque	55 Nm
Speed	2600rpm
Reduction ratio	1,93:1
Nominal battery voltage	104 V
Liquid cooling	
Weight	42 kg
Boat size	up to 50foot / 12 tons (depending on area of navigation)
