

THE NEW STANDARD IN PREMIUM SYNTHETIC TEAK DECKING

**NUTEAK** is the result of years of continuous development and improvement.

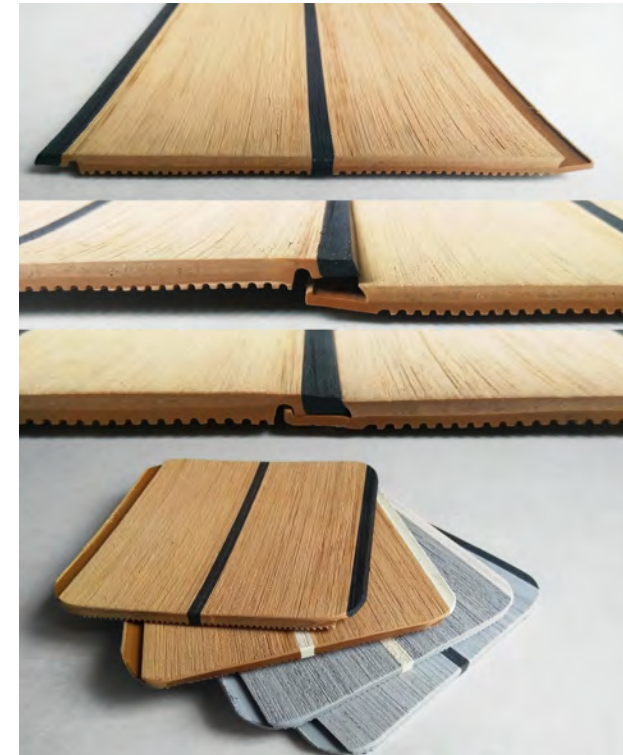

The method of male-female attachment has been greatly improved to speed up panel fabrication and increase bonding strength. We retain the premium quality that you have come to know and expect from **NUTEAK**, while reducing cost and delivery time. Our goal is and has always been to deliver the timeless look and feel of genuine Teak, without the maintenance.

**NOW AVAILABLE AT OUR NEW EUROPEAN DISTRIBUTION CENTER IN AUSTRIA**

#### **NUTEAK'S NEWEST FEATURES:**

- STRONG ANGLE** - Drop down profile with 300% more bonding wall

- Patented click connection
- No underlay required
- Environmentally friendly
- Affordable alternative to real teak
- Produced in Switzerland
- 20 Year guarantee

# FixTech™

# MAST™

Marine Adhesives and  
Sealants Technologies

## SPECIALISED ADHESIVE AND SEALANT FOR SYNTHETIC TEAK

**FIX3** is a high quality, high strength, single component specialist adhesive sealant, suitable for the installation of NuTeak. Bonds strongly to substrates such as, fibreglass, aluminium, steel, concrete ceramic tiles and most other common substrates.

**FIX8** is a high quality, architectural grade, single component, high modulus structural silicone sealant, that exhibits excellent physical properties. Suitable for sealing and structural bonding in glazing applications with metal, aluminium, most plastics and fibreglass substrates. Excellent weatherability and UV resistance, curing to a high performance flexible rubber sealant.

**MAST** is a specialised marine super glue that bonds most metals, plastics and elastomers instantly (2 to 12 seconds). NuTeak planks are bonded so strongly that welding is no longer necessary.

**NOW AVAILABLE AT OUR NEW EUROPEAN DISTRIBUTION CENTER IN AUSTRIA**

### Features:

- Primerless adhesion on most substrates
- Excellent UV resistance and long lasting color
- Very good gap filling capabilities
- Neutral cure
- Excellent stability, suitable for marine exposure
- Superior weather resistance up to 20 years
- Permanently elastic
