

A WORD FROM A HAPPY CUSTOMER

WELL WORTH EVERY PENNY

The advantage that the installation of Dockmate® provides cannot be overemphasized: Enabling me to remotely control my boat whilst standing on deck when docking, and then being able to step directly ashore and get a rope secured before the tide/wind carries me away again.

EXPLORE *the* WORLD

dockmate® 

DOCKING MADE EASY

THE DOCKING REVOLUTION

With the waters more crowded and the rise of affordable state-of-the-art technology, we believe now is the time to revolutionise the way we dock.

At Dockmate®, we feel it is our mission to give captains the confidence they need to go and explore the world by setting the world free from docking stress.

What if you could move around on your boat while docking? What if you could operate all manoeuvring systems for docking, using a single remote control? What if docking becomes a stress-free experience?

Are you ready to join the Docking Revolution with Dockmate?
