## FIBERGLASS HULLS

## ALUMINUM/STEEL HULLS

### DC POWER

#### SV44 LED GEN II

- Ideal for any small boat or center console up to 50ft
- Surface mounted for simple installation
- Thermoplastic housing, no corrosion, no bonding required
- Available in white or blue
- 1826 lumens in white, independently verified
- 10 – 30 VDC

patent pending

#### SV55 LED GEN II

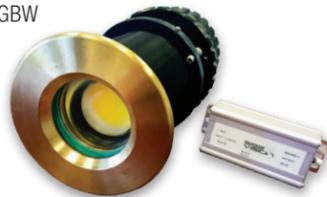

- Robust light suitable for all boats up to 50ft
- Surface mounted, simple installation
- Available in white, blue or RGBW
- COB high density chip, the brightest
- 4660 lumens in white, independently verified
- 10 – 30 VDC

patent pending

#### SV19 LED GEN II

- Ideal for mid-sized boats
- LED COB high density chip, the best
- Available in white, blue or RGBW
- Advanced silicone optic technology
- 3484 lumens in white, independently verified
- 10 – 30 VDC

#### SV31 CAMERA

- Ideal for steel or aluminum yachts
- Available weld thru hull fittings from 0 – 50 degrees
- Broadcast quality picture
- NTSC or PAL
- Ideal for safety or viewing the underwater life
- Can be combined with lights for night viewing

#### SV14 ALU / SS LED

- Weld in light for all steel and aluminum yachts
- Available weld thru hull fittings from 0 – 50 degrees, suitable for all hull shapes
- Advanced silicone optic combined with COB LED chip
- No additional cofferdam required
- Available in white, blue, green, RGB or RGBW
- Multiple options for RGB control
- 21,685 lumens in white, independently verified
- 100-277 VAC, 50/60Hz
- Available in HID
- Installed on transom, hull sides or through the bottom

#### SV20 LED

- Suitable for any small to mid-sized boats
- High density COB LED chip, the best quality
- Thru hull light, serviceable from inside the boat
- Available in white, blue
- 3040 lumens in white, independently verified
- 12 or 24VDC
- Available in HID
- Installed on transom, hull sides or through the bottom

#### SV27 CAMERA

- Ideal for fiberglass boats
- Broadcast quality picture
- NTSC or PAL
- Ideal for safety or viewing the underwater life
- Can be combined with lights for night viewing
- 12VDC

## RETROFIT KITS FOR EXISTING SEA VISION HID PRODUCTS

#### SV19 LED - RETROFIT

- Direct LED replacement for 50W HID
- Haul out not required for replacement
- Advanced silicone optic combined with COB LED chip
- Available in white, blue or RGBW
- 3484 lumens in white, independently verified
- 10 – 30 VDC

#### SV20 LED - RETROFIT

- Direct LED replacement for 35W HID
- Haul out not required for replacement
- Latest high density COB LED chip
- Available in white or blue
- 3040 lumens in white, independently verified
- 12 or 24VDC

#### SV10 LED - RETROFIT

- Direct replacement for 150W HID
- Haul out not required, retains original thru hull fitting
- Advanced silicone optic combined with COB LED chip
- Available in white, blue, green, RGB or RGBW
- 21,685 lumens in white, independently verified
- 100 – 277 VAC, 50/60Hz

#### SV14 LED - RETROFIT

- Direct replacement for 150W /250W HID
- Haul out not required, retains original thru hull fitting
- Advanced silicone optic combined with COB LED chip
- Available in white, blue, green, RGB or RGBW
- 21,685 lumens in white, independently verified
- 100 – 277 VAC, 50/60Hz

These retain any existing class approvals.

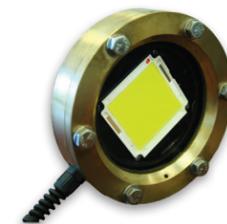

#### SV14 TANK LIGHT

- Weld in light suitable for all steel and aluminum yachts
- Approved for water or ballast tanks
- Available weld thru hull fittings from 0 – 50 degrees, suitable for all hull shapes
- Advanced silicone optic combined with COB LED chip
- Available in white, blue, green, RGB or RGBW
- No cofferdam required
- 21,685 lumens in white, independently verified
- 100-277 VAC, 50/60Hz

#### DV59 LED

- Designed specifically for lighting up underwater areas, suitable for salt or freshwater.
- High density LED chip, brightest and most recent development
- Ready to install and utilize immediately
- Available in white, blue, green or RGB
- Customizable, built to suit specific requirements
- 15000 lumens in white, independently verified
- 100-277 VAC, 50/60Hz

## DOCKS

### AC POWER

#### SV10 LED

- Suitable for any mid to large vessel, GRP or wood
- Serviced from inside the hull
- Advanced silicone optic combined with COB LED chip
- Installed on transom, hull sides or through the bottom
- Available in white, blue, green, RGB or RGBW
- 21,685 lumens in white, independently verified
- 100-277 VAC 50/60Hz
- Available in HID

#### SV60 LED

- Surface mounted, suitable for all mid to large sized boats with limited interior access
- Advanced silicone optic combined with COB LED chip
- Available in white, blue, green, RGB
- Multiple options for RGB control
- Serviceable in water, requires additional backing plate
- 21,685 lumens in white, independently verified
- 100-277VAC 50/60Hz
